### Baxa launches rapid-fill automated syringe filler

Baxa Corporation, of Colorado in the US, has introduced the Rapid-Fill Automated Filling System (ASF) to automate the process of sterile syringe filling, capping and labelling in a pharmacy hood. The Rapid-Fill ASF needs no preventive maintenance and is designed to minimise cleaning requirements, the company says. The cover maximises laminar flow to ensure fluid-path sterility and maintain integrity during the cap removal, filling and capping process.
