Industrial Training Inc. will be hosting the best Allen-Bradley RSLogix™ PLC training your maintenance and engineering personnel can get. How? Business Industrial Network will provide their leading expert on Allen-Bradley™ Programmable Logic Controller (PLC) troubleshooting as your instructor.

This two day seminar is based on the same onsite customized PLC 5™ and SLC 500™ PLC training course used to reduce downtime in FDA regulated manufactures, Government Facilities and Fortune 500 companies through out the United States.

**To offer you the greatest return on your PLC training investment this seminar is focused on ...**

- **Reducing Downtime**
- **Safe and Reliable Procedures**
- **Continuing Self Education**

The instructor for this seminar will be Donald B. Fitchett, who has not only been teaching about PLCs for over 10 years, but has designed and implemented world class training programs around the world. Don will also bring to this seminar his expertise on the true cost of downtime to stress the importance of quick reliable troubleshooting.

### Customer Comment ...

"Our skill levels ranged from expert to beginner and no one was left behind. Tell Don I said hello when you speak with him. This guy is good."

Ross Thomas, Jr  
BNFL  
K33 Decon/Final Survey Building Ops Manager

**Additional Information:** *This seminar is great for the cross training maintenance mechanic on up to the engineering support for maintenance. You're on your own for lunches. If AFE member, indicate so in name field. Cancellations may apply fees to other training classes. Instructor recommends, but does not require you to bring the lap top you use with RSLogix® installed for extra help with specific questions to your setup.*
