

Press release – Kirk now in Europe

Kirk pro photography equipment now available in Europe

April 29th 2004, the Internet — **Camera support items, such as “L-brackets” and “lens collars” made by Kirk Enterprises Inc., USA, are now available in Europe through the [Nikonians Photo Pro Shop](http://www.photoproshop.com).** Until recently, semi-professional and pro photographers in Europe had to buy their special camera support equipment in the USA. Now Nikonians are stocking and selling the most useful pro items in Europe, making customs, long delivery times and

pre-payment across the ocean a thing of the past.

The Nikonians Kirk programme focuses on products for Nikon, such as lens collars for the Nikkor AFS lenses, the 80-400 VR, 80-200mm and 300mm. These replacement collars improve the stability of these longer lenses. L-brackets stabilize the camera on tripods with an Arca quick release type of connection, such as the Markins ball heads. Brackets for the semi-professional and professional Nikon bodies, such as the F5, F100, D100, D1 and D2 are available. Brackets and collars for Canon bodies will be provided if enough interest is shown.

For more information, availability and pricing on the Kirk L-brackets and lens collars, visit <https://www.photoproshop.com>

Nikonians - Worldwide home for Nikon photographers

With over 17,000 members from over 100 nations, Nikonians® is the largest of its kind. Founded in April 2000, the community provides ebooks, an ezine, over 60 discussion forums, digital resources, contests, local events, workshops and much more.
