KM x — The Advanced Distributed Learning Platform ™

An affordable, full-featured, enterprise learning delivery and management solution!

KMx is our advanced distributed learning platform that is globally scalable and provides an integrated environment for developing, managing, and delivering learning content and performance support. KMx enables rapid content creation and delivery by a wide range of content creators including instructional designers and subject matter experts. KMx delivers robust capabilities in the areas of personnel qualification management, student registration and tracking, records management, and reporting. Using permissions tailored to your organization's needs, content is published to a web environment to provide context-driven, personalized delivery. KMx provides

unparalleled levels of support for any blend of delivery environment including: self-paced, asynchronous web, synchronous web, traditional instructor-led courses and electronic performance support documentation.

Go Live with Presentation Broadcasting!
Microsoft's Presentation Broadcasting for PowerPoint 2002 makes it simple for users to provide presentations to others via the Web. KMx and Presentation Broadcasting provide powerful classroom and presentation functions in a complete, integrated package for the Internet or corporate intranet. Available with Microsoft NetMeeting's comprehensive suite of data conferencing tools, you can collaborate and share applications with participants in real-time. You can exchange graphics or draw diagrams with the electronic whiteboard and send messages with text-based chat.

Conformance Tested
KMx has been tested using the ADL SCORM Conformance Test Suite Version 1.2.3 and passes with a conformance level of LMS-RTE3 and ADLCP-PIF1. KMx implements SCORM requirements for a Learning Management System (LMS) including support of the SCORM Application Program Interface (API) and the SCORM Data Model. KMx provides fully automated Import and Export of SCORM conformant content packages without any user intervention.

KMx was designed for use with Microsoft® Internet Explorer 5.5 and above for Windows.
