

ICV04 Miniature In-Car-Video-System

Applications:

- Police patrol vehicles
- Fire trucks
- EMV
- Public transportation
- Training

DESCRIPTION

The **AVALON** ICV04 is a four channel video recorder, records streaming audio and video on an internal hard disk drive at 30 fps. It is designed to fit under a vehicle seat and receive commands through a remote control, a computer, or a remote smart display.

Recording is triggered manually or automatically by an external signal, such as siren, flashing light activation, or code 1-2-3 in a police patrol vehicle.

The recorded streaming video can be read via a USB port or archived on a standard CD R/W media.

Simple operational design: Power on/off and manual record on/off switches.

ICV4 FEATURES

- Four video/audio inputs: A wireless LC618M lapel camera (or MX416 microphone), one windshield camera, a back seat camera and a trunk camera.
- Video quality admissible in court.
- VITC time/date stamp on all recorded video.
- Code 1,2,3 and siren wireless interfaces to start recording with manual override.
- Recording "best evidence" of up to 1 hour on a 400MB Dataplay® CD.
- USB 2 interfaces to vehicle computer/gateway.
- Utilizes standard 12 volt powering, in ruggedized case.
- Economic space saving design and operation.
