Triveni Infotech is an Australian based Application Service Provider (ASP) that offers to businesses managed applications on a hosted model. We are dedicated to delivering end-to-end solutions including hosted services to organisations of all sizes.

Infrastructure

Triveni Infotech has built an enterprise-class hosting platform that provides comprehensive end-to-end management solutions. Our server farm is comprised of **Dell Power Edge** range of servers. We provide a fully managed service that integrates our hosting capabilities with full management of the application and a single point of contact to administer the solution.

Staff

Triveni prides itself on providing the highest level of customer service. Our staff are all Microsoft qualified and professionally trained. Their experience and friendly attitude ensures that our clients enjoy an unprecedented level of support and satisfaction.
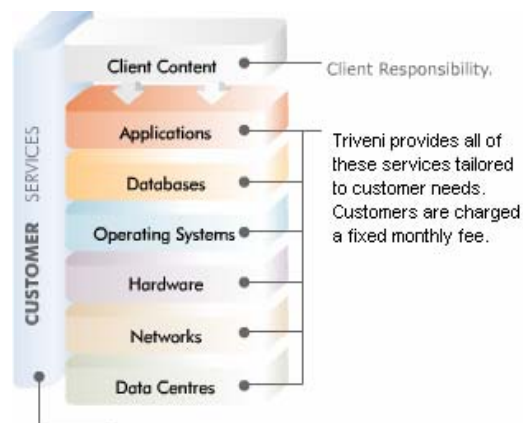

Security

Security is paramount at Triveni. From physical components to logical authentication and encryption, content-filtering and virus scanning, we provide cutting-edge security technology, alert services and incident management support to help decrease system vulnerability. Along with a Class-A infrastructure, you get a written SLA (Service Level Agreement) that guarantees security and confidentiality of your data on each and every aspect of the hosting process.
