Build Setups For
Windows and .NET

"InstallAWARE has enabled me to fully support Windows Installer, yet remain in full control of what's going on."

*Troy Wollbrink,
TNT Software*

InstallAware 3.0

 *Advanced MSI
Setups Made Easy*

Are you tired of conventional installers that are inflexible, time consuming, and just too complicated?

InstallAWARE is designed to meet your setup authoring needs for maximum flexibility, outstanding ease of use, and complete control over the setup process.

Powerful - Yet Easy To Use

InstallAWARE provides you with a unique fusion of Windows Installer, web deployment, and scripting technologies. Easily build Windows Installer setups without the hassle of manually populating MSI tables, databases, or lengthy sequences. Simply create a conditional setup script, and *InstallAWARE* magically converts that script into a logo-certifiable Windows Installer package!

Distributed Web Deployment

InstallAWARE gives you the choice to split your setups into multiple online and offline parts. Easily remove application runtimes and rarely used application features while making sure that essential application data is contained within the main setup.

► *Boost Developer Productivity*

- Visual IDE automatically generates installation scripts
- Code view provides complete access to the heart of the installation
- Automatically creates logo-compliant MSI databases

► *Enjoy Maximum Flexibility*

- Write your own scripts instead of populating MSI tables
- Easily deploy some setup blocks offline and others online
- Select from a variety of wizards, projects, tools and templates

► *Create Impressive Setups*

- Interactive progress dialogs with Flash/HTML billboards
- Choice of 10 setup themes for stunning UI's
- Sophisticated dialog editor with a rich set of controls
- Superior compression eliminates the shared overhead in executable files and tightly compresses runtimes

InstallAWARE is available in three editions:

- PROFESSIONAL
- ENTERPRISE
- ARCHITECT

What Do Our Customers Say About InstallAWARE?

"The ability to completely alter the user interface, combined with both a powerful scripting engine and a visual interface make *InstallAWARE* head and shoulders above the competition."

Andrew Neillans, ABCC Software

"I know absolutely nothing about creating Windows MSI based installers, but with *InstallAWARE* I don't need to. It's so easy to quickly get up and running with *InstallAWARE*!" **David Clegg, eBetOnline**

Powerful wizards, templates and intuitive tools allow you to quickly build stunning setups that impress your customers

MimarSinan International is a leading provider of Internet based software installation, data compression, and file utility technologies. The privately held company is a Borland Technology Partner and serves both corporate and individual clients worldwide. Founded in 1996 by Sinan KARACA with the mission of developing applications and software development tools for Microsoft Windows platforms, and recently the Microsoft .NET Platform, MimarSinan focuses on installation and data compression products.
