PCMantra RegFix Mantra

## Why do you need a Registry Cleaner?

- With due course of time, Windows Registry gets effected due to newer software incomplete installations, poorly written uninstallation programs, Adwares, spywares, Trojans, viruses etc.

- These changes generate inconsistencies in the Windows registry. The inconsistencies may be of varied nature like Empty keys, false uninstall information, missing cross references etc.

- These inconsistencies results in degrading PC performance, slower command executions, system crashed, windows internal errors and difficult to understand Windows Errors.

- Overall system performance is hampered, your favorite software functions slowly and even the fastest computer gets disgustingly slow.

- All this renders your system unstable and increase the chances of OS crash.

What will RegFix Mantra do?

RegFix Mantra is an extremely user-friendly and highly advance end tool, made easy for all windows users. It is highly advisable to take immense care with windows registry. With PCMantra's RegFix Mantra, you don't have to be scared any more. It safely cleans all the errors from your registry, while you have a piece of mind.
