

STS-Fleet

- Designed for fleet management and tracking applications which require continuous position reports and on demand location using the GPS/GSM/GPRS/SMS network.
- Uses Sony Ericsson's cellular technology and Trimble's GPS satellite technology.
- Includes a logical event engine interface which allows the configuration of predefined rules and permissible and non-permissible actions which enable features such as geo-fencing, time distance reporting, timers, route adherence, virtual odometer, speed thresholds and more.
- 5 digital inputs, 4 digital outputs, 3 analog inputs and 1 serial port allows users to control and read sensors, switches and serial devices.
- Hidden microphone and external speaker available in select models.
- Positions on demand regardless of the dynamic IP address assigned by GSM/GPRS operators. Units are always visible to the dispatcher application.
- Reports position, time, distance or any type of event to the AVL application in a matter of seconds.
- Permits bidirectional communication via GPRS, SMS, and an optional MDT. Voice communication available on select models.
- Can be controlled and reprogrammed OTA (over the air) at any time.

Secure Tracking Systems

STS-Fleet™

GSM/GPRS Tracking Device for Fleet Managers

**The world's first
Affordable
Fleet Tracking System!**

www.sts-locator.com

BENEFITS

STS-Fleet enables fleet managers to:

- ◇ Automate location and inventory
- ◇ Enable fleet visibility and optimize fleet utilization
- ◇ Manage driver efficiency
- ◇ Reduce fuel consumption and legal costs by controlling speeding
- ◇ Reduce maintenance costs by monitoring mileage, temperature, or other service indicators
- ◇ Generate incremental revenue (more jobs completed per day)
- ◇ Improve customer service by improving response time and by providing a more accurate ETA
- ◇ Identify misplaced, lost, and stolen vehicles/trailers quickly and efficiently
- ◇ Reduce recovery and repair costs
- ◇ Decrease downtime and cost through accurate asset management
- ◇ Eliminate liability incurred due to unauthorized moonlighting with company vehicles and mobile assets

FEATURES

Location Information

Available on demand via the STS-Locator web site or optional standalone application

Alarm Notification

Notifies you when an alarm has been activated via text message to any web enabled device (pager, PDA, cell phone, email address, etc.)

Motion Notification

Warns you if your vehicle has been moved without your permission. (Every second counts during vehicle theft to improve recovery efforts)

Geographic Boundary Notification

Notifies you when the vehicle or mobile assets enters or leaves a pre-configured restricted geographical area

Speeding Notification

Notifies you when the vehicle or mobile asset exceeds a pre-configured speed threshold

Historical Location Information

Review 30 days of location and alarm data online. Export historical data in a variety of formats for custom reporting and for indefinite historical archives

Automated Reports

Receive daily, weekly, or monthly usage reports automatically, personalized to include only the data which is important to you

Recovery Assistance

If a theft does occur, a Secure Tracking Systems Service Agent will be available to assist you in the recovery of your vehicle or mobile asset

Insurance Discounts

Secure Tracking Systems products and services may entitle you to an insurance discount (15% is typical)

STS-Fleet™

**IMMEDIATELY IMPROVES EMPLOYEE
ACCOUNTABILITY AND REDUCES
WASTE**

MONITOR CUSTOMER VISITS

**TRACK STOP TIME AND DURATION
AT CUSTOMER SITES**

MONITOR UNAUTHORIZED USE

STS-Fleet is an ideal solution for vehicle monitoring, truck tractor, fleet management, onboard security tracking, and Remote diagnostics.

A Company can inexpensively communicate the position and condition of a vehicle, asset, or individual to a dispatcher, inventory center, or home.

GAS TAX REPORTS (BY-STATE)

STOP REPORTS (BY DURATION)

EXCESSIVE SPEED REPORTS

**MILEAGE LOGS HELP VALIDATE
TRIP REIMBURSEMENT**
