Fleet Management & GPS Tracking Specialists

Affordable Tracking Solutions

Device independent solutions for increased productivity, cost reduction, driver safety, asset protection and business growth

PERFORMANCE & EFFICIENCY

STS products enable the highest level of security for any mobile asset, providing instant location information accessible from your Personal Computer and without the need to call third party monitoring companies.

STS applications are modular and feature rich, allowing us to build the solution that is right for your business. We provide fleet and freight management solutions such as cargo tracking, route planning, order management, and logistics for road, rail, air and sea. Whether you need vehicle tracking alone or a comprehensive fleet management system, STS has a solution.

CUSTOM SOLUTIONS

STS will assess your needs and then create comprehensive solutions to best fit your business model. A cost effective solution for YOU that will improve the performance of YOUR business.

STS allows any company, large or small, to gain substantial and almost immediate benefits, allowing ROI for our customers in months, not years.

LET STS SHOW YOU WHAT REAL PERFORMANCE CAN BE!

ABOUT STS

Secure Tracking Systems is a solutions provider focused solely on the transportation and container shipping industries.

Using advanced technology and a commitment to lead the industry, STS has the ONLY fleet management offering to combine robust asset tracking systems with highly-focused fleet applications, and expert, quality-oriented personnel to provide full end-to-end solutions that deliver real savings to your company.
