BENEFITS

STS-Locator empowers equipment managers

- ◇ Eliminate Information “black holes” when containers leave the Port.
- ◇ Enable container fleet visibility and optimize fleet utilization
- ◇ Accurate inland details, supports detention and demurrage charges
- ◇ Generate incremental revenue (more container turns per year)
- ◇ Improve customer service by improving response time and by providing a more accurate ETA
- ◇ Identify misplaced, lost, and stolen containers quickly and efficiently
- ◇ Reduce recovery and repair costs
- ◇ Lower Insurance costs
- ◇ Decrease downtime and cost through accurate asset management
- ◇ Have the right equipment, in the right place, at the right time
- ◇ No more black holes of information

FEATURES

World's first cost effective container tracking system!

Location Information

Provides inland equipment tracking , worldwide (wherever GSM service is available), reports on latitude, longitude, direction, and speed

Easy Web Access

Access location information 24 hours a day, easy and conveniently with any standard web browser and on-line maps for easy viewing

Simple to Operate

Device is water and dust resistant, runs on four AA batteries, and uses a sleep mode to conserve battery life

Motion Notification

Warns you if your container has been moved without your permission. (Every second counts during container theft to improve recovery efforts)

Automated Reports

Receive daily, weekly, or monthly usage reports automatically , personalized to include only the data which is important to you

Historical Location Information

Review 30 days of location and alarm data online. Export historical data in a variety of formats for custom reporting and for indefinite historical archives

Recovery Assistance

If a theft does occur, a Secure Tracking Systems Service Agent will be available to assist you in the recovery of your container or mobile asset

Insurance Discounts

Secure Tracking Systems products and services may entitle you to an insurance discount (15% is typical)

Security Management Value

Leading Technology

Secure Tracking Systems combines state of the art components into integrated container tracking services.

Modular electronic tracking devices

Global digital data communications networks

Enhanced GPS satellite tracking modules

Global Web-based mapping

Internet based real-time location and event monitoring
