

## **Celerus Networks® Unveils All-In-One Wi-Fi Management Software Suite in a Free Software License Package – Offer Makes Wi-Fi More Affordable Than Ever**

*Celerus Networks ships its feature-rich Wi-Fi management software suite with a no-cost software license delivering unprecedented savings to network builders & managers. The wireless management package offers unsurpassed affordability coupled with comprehensive support services.*

Washington, D.C., June 20, 2005 - Celerus Networks (<http://www.celerusnetworks.com>) delivers its feature-rich wireless management software in a no-cost software license package making high-end public access Wi-Fi services affordable to entities of any size. Celerus' Service Management Platform – Standard Edition (SMP-SE) is ideal for deploying free or fee-based Wi-Fi services in single and multi-site public access environments including retail, property management, municipal and federal government.

The no-cost software license provides network builders immediate benefit by eliminating potentially thousands of dollars of upfront expenses, while allowing the savings to be directed towards other purposes such as equipment and operations. For some small and medium-sized businesses, the savings may allow wireless services to be built that wouldn't be possible otherwise.

Facilitating easy setup, Celerus delivers wireless equipment packages together with the SMP-SE management suite making installation at the customer site virtually plug-n-play.

Celerus provides a full range of software and professional services including its support portal that offers tools and guidance to assist in network administration. The SMP-SE offer requires annual software maintenance which provides the latest updates and feature enhancements. The license permits unlimited clients and backup server for high-availability operations.

The SMP-SE software suite and packaged systems are distributed internationally and available directly from Celerus Networks.
