

4th Annual Printable Electronics and Displays Conference & Trade Fair

October 26-28, 2005
Tuscany Suites & Casino
Las Vegas, Nevada

IMI's 4th Annual Printable Electronics and Displays Conference & Trade Fair is *the conference of the year* dedicated to all critical aspects of printable electronics and displays. IMI's 4th annual meeting and trade fair is an industry lead yearly event that leverages years of past expertise in this rapidly evolving industry. This event is designed to bring together experts and leaders in the areas of printable electronic materials, printing systems and printable electronic and display applications from the US, Asia and Europe.

Electronic and display device manufacture is poised to undergo a renaissance through the utilization of low-cost, high-speed printing technology. Over the last several years, with the advent of such technologies as printable organic semiconductors, high-resolution ink jet printing presses and low-cost, high reliability flexible substrates, just to name a few, manufacture of electronic and display devices by high speed printing is beginning to be utilized in commercial environments. This revolutionary shift in manufacturing philosophy will allow for significant cost reductions in existing products like TFT LCDs and hence will allow manufacturers to expand current products into new markets and also develop entirely new, economically viable products such as smart packaging solutions, flexible displays and RFID tags.

IMI's 4th Annual Printable Electronics and Displays Conference & Trade Fair will strategically represent all critical materials, printing and device/application technologies in this emerging field. Areas which will be addressed include printable conductors, semiconductors, dielectrics and resistors, ink-jet, offset lithographic, flexographic and gravure printing as well as device manufacturing applications such as printed circuit boards, RFID tags, displays, sensors, smart packaging and membrane keyboards.

This conference and trade fair, pioneered by IMI in 2002 as the first of its kind, will be a worldwide meeting place for "who's who" in this rapidly evolving new industry. It will allow presenters, attendees and exhibitors to meet, learn and promote their technologies, vision, products and services.

The **Trade Fair** is dedicated to bringing together companies who offer goods and services to the industry and end-users or device manufacturers looking to utilize high speed printing as a manufacturing process. The companies represented in the trade fair are true, reliable commercial suppliers of materials, print systems, hardware and support services. IMI's mission in this trade fair is to aid in fostering this entire industry by developing a platform where commercial suppliers and customers can come together and view products and discuss possible business and technical solutions.
