- Audio/Video output for larger, external screen display
- And many, many more

WHAT IS GLOBALINX?

A BROADBAND TELEPHONE & VIDEOPHONE SERVICE LIKE NO OTHER

GLOBALINX is a 5LINX branded Voice over IP (VOIP) product that offers an affordable and easy-to-use broadband telephone and videophone service forged by a partnership with Packet8, designed with residential customers in mind. GLOBALINX allows anyone with broadband Internet access (e.g. cable, DSL) to use their regular phone to make UNLIMITED calls to anywhere in the U.S. and Canada for a mere \$19.95 per month (THIS INCLUDES VIDEO CALLS AS WELL!!). All GLOBALINX subscribers get world wide UNLIMITED calling to other GLOBALINX subscribers at no extra charge. Calls to non-GLOBALINX international numbers (outside the U.S. and Canada) are charged at a very low per minute rate. Check our international rates.

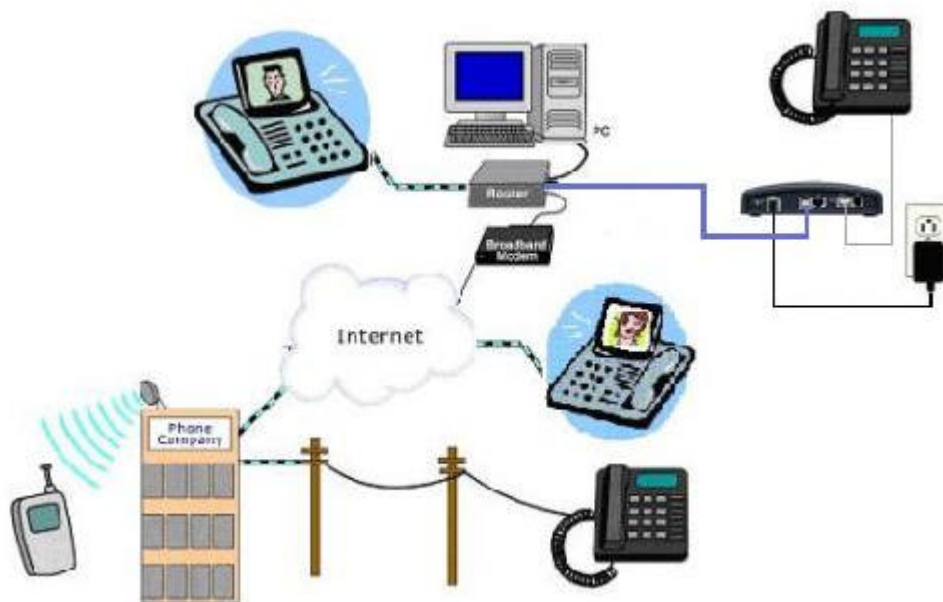

Do you have a broadband internet connection (DSL, Cable)?

[Order Now!](#)

HOW DOES IT WORK?

WITH GLOBALINX, YOUR CALLS ARE ROUTED OVER THE INTERNET

By taking advantage of a technology called VOIP (voice over internet protocol), high-speed Internet connections and Packet8's expertise in designing videophones, GLOBALINX is the complete voice and video communication service. GLOBALINX sends all calls through the [broadband telephone adapter](#) or the [videophone](#) which then routes the calls over the Internet, instead of using the traditional public telephone network. There are no extra numbers to dial, no special instructions and no talking through your computer. Just pick up your phone, hear a dial tone and dial any phone number. Incoming calls ring your phone the same as any traditional phone.

WHAT DO I GET?

UNLIMITED CALLING FOR ONE LOW MONTHLY RATE

When you subscribe to a GLOBALINX plan using our online store, you will be shipped a [broadband telephone adapter](#) (at no extra cost) or a standalone [videophone](#) at a greatly discounted price. Along with the equipment, you will receive a 10-digit activation code. GLOBALINX will transfer your existing number or give you a new telephone number from the area code of your choice.

Both GLOBALINX residential plans are feature rich without the costly taxes and regulatory fees that are required by the traditional local exchange carriers. All plans include more [features](#) than are available from your old telephone company.
