

Holistic Acne Solution Helps Thousands Worldwide In Quest For Clear Skin

Ex- acne sufferer launches a unique step-by-step holistic program to help acne sufferers worldwide in their quest for a lasting acne cure and an end to their suffering.

(PRWEB) June 30, 2005-- After suffering from severe acne for more than 13 years, trying almost every conventional acne drug and treatment, Mike Walden, a 33 year old writer from California, began an extensive 4-year research to find an alternative cure for acne and perhaps reveal the truth behind what he calls "the inflammatory disease of lies and misconceptions". Learn more: <http://www.AcneNoMore.com>

"Acne sufferers are getting tired of being exploited", Says Walden "There are too many marketers and charlatans out to make a fast buck on the expense of the vulnerable. Acne sufferers cannot afford to spend their hard earned money on useless pricey acne cures and quick fixes only to be disappointed time and time again."

Through his research, Walden realized that there is an abundance of acne cures that focus merely on the symptoms of acne, but very few if any that focus on permanently fixing the root cause.

"The sad truth", adds Walden, "is that even the so called natural approaches to the treatment of acne that are aimed to cure acne from within, are either unrealistic, impractical and often pricey or they are just the same one- dimensional gimmick cures disguised as holistic solutions."

According to Walden, in order to permanently cure acne one must approach the disease from a holistic multi-dimensional perspective as oppose to tackling only a single factor that leads to acne formation. Furthermore, the program must be practical and logical to use.

"There is simply no other way, but the holistic way", says Walden, "The Acne No More™ program was born out of these necessities." Learn more: <http://www.AcneNoMore.com>

The Acne No More™ is a unique step-by-step holistic acne solution, consisting of several sub-plans each designed to tackle a different factor responsible for acne. The main idea is using both the powers of the body and the mind to help the skin heal itself from the inside out.

In a down-to-earth often very personal and moving style Walden will guide you through the entire practical process of getting rid of your acne holistically, and achieving glowing acne-free skin, without the costs and side effects of conventional medications.

Targeting acne sufferers who have tried or wish to avoid conventional drugs and harsh topical treatments, the Acne No More™ program has been proven effective with all types of acne, in all levels of severity.

Since its release, in early 2005, the Acne No More™ program, the result of 4 years of research and experiment, has literally helped thousands of people worldwide to achieve clear skin.

In a message to Walden, Vicky Evans a 26 years old from the U.K, who's 'before and after' photos are posted on the <http://www.AcneNoMore.com> website, writes: "I had terrible acne for more than 9 years. There were many times when I seriously thought about giving up until I found your program. Today, my skin is practically perfect. I look and I feel like a new woman. You really made a difference here and I have no words to express my gratitude."

"No, I'm not a dermatologist, " laughs Walden, "but I sure am proud to have created a program that truly helps other acne sufferers to end their physical and emotional scarring for good and gain their lives back".

The Acne No More™ program includes personal one-on-one counseling and support through the process provided by the author.
