

Pool Enclosures

The Value of Swimming Pool Enclosures

Not just for swimming--enclosed pool areas provide beautiful and serene settings for morning coffee or breakfast, reading a book or watching a sunset.

Pool enclosures bring your living and backyard recreation areas together in such a way that it becomes a focus for family fun, relaxation and health; like having a vacation spot just outside your door.

Besides adding value and enjoyment to your home, pool enclosures offer the practical advantages of bug and pest protection, a reduction in leaf and airborne debris problems and decreased chemical and maintenance costs.

One of the primary purposes of swimming pool enclosures is to help provide a safe swimming environment and to prevent accidental injury or drowning. Enclosures combined with home door alarms, roll away fencing, water alarms or other such safety devices greatly decrease the possibility of accidents.

Guardian Child Safety Fencing is available in both 4 foot and 5 foot heights. Our 4 foot high barriers are available with either a 36 inch or 30 inch pole spacing. Our 5 foot high barrier is installed with a 30 inch pole spacing only.

Our Child Safety Fencing is available with black, green, or silver colored posts, two different locking mechanisms, and two different fabrics in three colors. The poles are either our super-strong aluminum quad core pole, or fiberglass. All of our fencing is designed to be as transparent as possible.

Safety and beauty can easily coexist with a Guardian Pool Fence system.
