

ASSEMBLE CONNECT INC.

A WORLD OF MANUFACTURING SOLUTIONS

ASSEMBLE CONNECT, INC. is SERVICE

At Assemble Connect, Inc. we understand that outstanding service is a primary requirement in your sourcing needs.

Service needs are dynamic, so are our capabilities:

Because of the wide variety of manufacturing technologies in assembly, subcontracting companies have varied strengths. When a particular wire harness, cable assembly, or other assembly does not fall into the core competencies of a source, that company must often have to spend considerable time and expense to meet those unique needs. This can translate into a higher total acquisition cost to the customer.

We are the Solution:

We manage a network of independent companies who provide these services. We will consolidate your jobs to companies with those capabilities already in place. We have locations nationwide and almost unlimited capabilities and capacity. The result is a lower total cost and production time for the customer.

Local Service. Local Support. Nationwide.

We can arrange to have your work done in a certain geographic area to support your needs. We can even have work done or inventory held at multiple locations to support separate divisions within your organization. We can hold a wire harness in New England, a PCB in Chicago, and a cable assembly in San Jose if that is what you need.

THE ASSEMBLE CONNECT ADVANTAGE

Assemble Connect, Inc. has developed a system that benefits both the customer and the manufacturing partner. The custom information system was designed from the ground up to address the specific needs of the industry it serves.

CUSTOMERS

The Assemble Connect Inc. engineering staff evaluates each new RFQ and selects a combination of over 150 different processes and approvals that apply to that quote. That information creates a list of potential manufacturing plants that can suit that need. An appropriate number of plants selected to review. Quote requests are completely confidential. Only Assemble Connect, Inc. contacts the customer. If there are questions from the manufacturing plants, they are consolidated by the account manager and reviewed by the engineering staff. If the Assemble Connect, Inc. team determines a need for additional information, a consolidated list of questions is sent to the customer. After quotes are submitted and the order is processed, Assemble Connect, Inc. handles all shipping, billing and logistics needs. The end result is a lower total cost, superior quality, and virtually unlimited capacity.

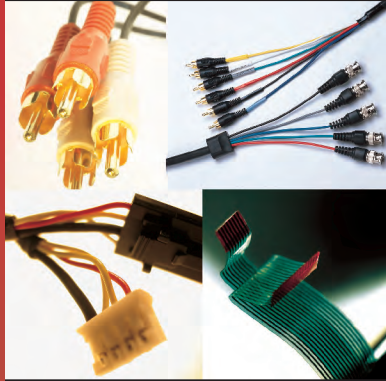

MANUFACTURING PARTNERS

Every RFQ is matched to a combination of over 150 different processes and approvals necessary to meet the customer need. Manufacturing partners only receive RFQs that fit their own business model and their strengths and goals. The RepConnect internet based quote review system allows all partners to check the status of open and closed quotations. Assemble Connect, Inc. has an exceptionally high win percentage on quotes which translates into more sales for the manufacturing partner with minimal excess work. Manufacturers also do not have to worry that submitting a "no-bid" on one part or one job will cost them a chance at the customer. In addition, Assemble Connect, Inc. becomes the primary customer which reduces new account setup, credit checks and payment burden.

SERVICES AND PRODUCTS

Assemble Connect Inc, has a network of manufacturing facilities to handle many types of assembly. There are plants that specialize in high and low volume, low and high mix, domestic and international.

WIRE HARNESS & CABLE ASSEMBLY

- INDUSTRIAL
- RIBBON CABLES
- WIRE & TUBING PREP
- FIBER OPTIC CABLES
- FLAT FLEX CABLES
- AUTOMATED TERMINATIONS
- POTTING
- DATA CABLES
- COMMUNICATION
- APPLIANCE

POWER CORDS

- NEMA STANDARD
- EUROPEAN STANDARD
- CUSTOM TERMINATION
- LOGO MOLDS
- CUSTOM COLORS
- HIGH POWER
- SPECIAL WIRE
- CUSTOM MOLDS

CUSTOM METAL AND PLASTIC PARTS

- INJECTION MOLDING
- METAL STAMPING
- ULTRASONIC WELDING
- OVERMOLDING
- CUSTOM PAINT
- CUSTOM MACHINING

PARTS AND COMPONENTS

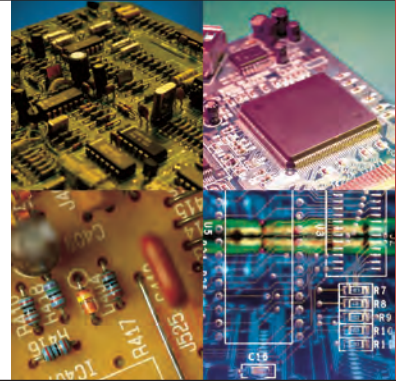

- CONNECTORS
- IMPORT PARTS
- LIGHTS & BULBS
- BATTERIES
- HARDWARE
- ELECTRONIC COMPONENTS

WORLDWIDE MANUFACTURING

The wide variety of locations allows a customer to start small and grow without having to change vendors. It also allows dual sourcing of parts through one logistics provider. The balance of import vs. domestic product is easy to control.

PRINTED CIRCUIT BOARD ASSEMBLY

- THRU-HOLE
- SMT
- MULTILAYER
- FLEX
- METAL CORE
- HIGH DENSITY
- MIXED TECHNOLOGY
- LEVEL 3

CUSTOM MOLDED CABLES

- COMPUTER / DATA
- LOGO MOLDS
- CUSTOM COLORS
- DISCRETE REDESIGN
- POWER
- SHIELDED
- INDUSTRIAL CONTROL

MECHANICAL ASSEMBLY & BOX BUILDS

- FASTENING
- TUBING ASSEMBLY
- FAN TRAYS
- SWITCH ASSEMBLY
- POWER SUPPLIES
- ULTRASONIC WELDING
- RIVETING
- SUBASSEMBLIES
- FINAL ASSEMBLY
- TURNKEY ASSEMBLY

DESIGN ENGINEERING SERVICES

- MECHANICAL DESIGN
- PCB DESIGN
- CABLE DESIGN
- DESIGN FOR MFG
- TECH ILLUSTRATION
- CAD DRAWING
- 3D MODELING

QUALITY & LOGISTICS SUPPORT

QUALITY

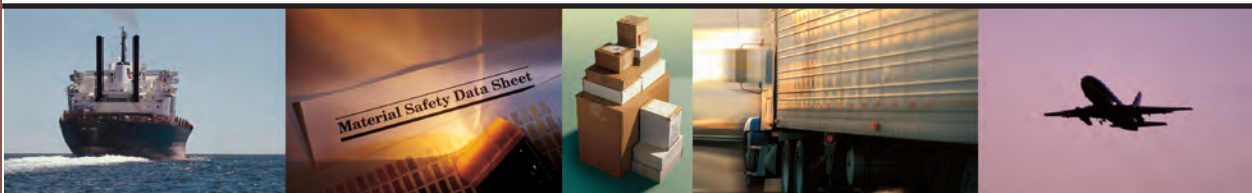

All manufacturing partners are quality certified. Different facilities have different approvals relative to their specific industries, processes and customer base. Quarterly quality reviews are done of each partner to insure that they are providing service that meets acceptable levels. Below are just a few of the certifications our facilities have:

- ISO9001:2000
- UL
- CSA
- IPC-610
- TS/ISO 16949
- IPC/WHMA-620
- QS9000
- VDE
- VDA 6.1
- MIL-SPEC
- ISO9002

LOGISTICS

Assemble Connect, Inc. was founded on the principle of service. The company offers logistic services to lower the total cost for every customer. Programs are available from simple just-in-time to complete direct-to-customer. Programs can be added, modified or combined on the fly to provide the best service for the customer. A partial list of these programs is below:

- JIT
- MRP
- SCHEDULE SHARE
- LINE STOCK
- CONSIGNMENT
- INTERNET ORDERING
- LOCAL WAREHOUSING
- CUSTOM PACKAGING

"Service the customer first, everything else will follow."
