### **Open Terra and Aware Interweave Partner to Deliver Rapid Mobile SAP Solutions**

#### **Supply Chain and Mobile Software Leaders Announce Partnership in Support Of SAP® Mobile Application based on Web Services Architecture**

**POTTSTOWN, PA--August 23<sup>rd</sup>, 2005**—Open Terra Inc., a leading provider of next generation enterprise mobility technologies, and Aware Interweave Inc, a leading systems integrator in "Real World Aware" solutions, announced today, that the companies have formed a strategic partnership to leverage the strengths of Aware Interweave's implementation of SAP® solutions and consulting expertise and Open Terra's mSolve™, a unique, innovative and extremely powerful complete end-to-end mobile business platform.

Under this strategic partnership Aware Interweave will now offer SAP mobile solutions including Open Terra's mSolve™, a powerful complete end-to-end mobile business platform and Aware Interweave's Systems Integration capabilities for SAP solutions and Mobile Infrastructure. This offering delivers customers an enterprise-scale Mobile-enabled solution that easily integrates with SAP industry leading web services initiative.

Moving forward, Aware Interweave and Open Terra plan to expand into a broader strategic partnership in which the companies will collaborate on joint product development and new product definition for mobile and RFID applications supported by SAP's Enterprise Services Architecture (ESA). These future efforts will not only streamline Mobile solution development and RFID adoption for SAP customers but will also provide a scalable platform designed to deliver the benefits of enhanced supply chain visibility.

"We are excited to be working with Aware Interweave, a leader in delivering reliable, integrated solutions that enable customers using SAP solutions to achieve supply chain optimization," said David Sasson, CEO, Open Terra. "Aware Interweave's expertise with SAP solutions, mobile applications, and RFID, combined with Open Terra's mSolve™ software, will enable Aware Interweave to rapidly deploy mobile SAP applications."

Open Terra's mSolve™ is a complete end-to-end enterprise mobility platform. The mSolve™ suite is the fastest, most robust mobile application development and deployment environment in the marketplace today, and is the first and only mobility platform utilizing a 100% online, on-demand technology framework. With mSolve™, mobile workers can communicate seamlessly with server-side enterprise applications from their cell phone or wireless device. mSolve™ comes complete with business connectors to a wide range of data sources, including Web Services, databases, Enterprise JavaBeans (EJB), and Message Queuing (MQ) systems, among others. The mSolve™ software suite also comes complete with intelligent mSolve™ device agents that can be deployed on virtually any mobile device, across any and multiple communication network protocols.

"Our customers rely on Aware Interweave to support the broad use of SAP Mobile and RFID applications across the extended supply chain, and we continually assess products that extend SAP functionality and simplify the project lifecycle." said Kim Obermair, president and CEO of Aware Interweave. "Open Terra's mSolve™ software meets our customers' need for an extremely powerful complete end-to-end mobile business platform that can rapidly develop enterprise-level mobile applications and support SAP's Enterprise Services Architecture strategic initiative."

### **About Aware Interweave**

Aware Interweave Inc. is a leading SAP consulting services company with expertise in "Real World Awareness" space.
