**FOR IMMEDIATE RELEASE**

Tel Aviv – September 5<sup>th</sup> 2005-09-02

**Human Monitoring has licensed Moonlight's Source Codes**

**The Honorable Judge Danya Kareth-Meyer of the District Court of Tel Aviv has approved on Thursday 1.9.05 the purchase offer that Human Monitoring Ltd ("HM") submitted for Moonlight's Video CoDecs source codes for Embedded Media Processors.**

The integration of Moonlight's proven CoDec technology with HM's algorithms will allow HM to offer the Philips Media Processors' customers unique solutions of superior quality having a significant technological edge for LCD-TV Sets, DVD Recorders, Surveillance Cameras, and Video Servers.

HM's Intelligent Algorithms include a **Digital Image Stabilizer**, and sophisticated **VMD** (Video Motion Detection), which incorporates **Privacy Protecting Technology**. These highly efficient algorithms can be integrated with full resolution open standard Video Encoders using a single low-cost Philips Media Processor,

**Moonlight Cordless Ltd.** is reputed for the quality of its open standard CoDecs, which were licensed to companies like NEC, Cyberlink, and Panasonic. The Company is under Temporary Liquidation since April 2004, the Temporary Liquidator being the attorney Ron Gazit, of Gazit, Rotenberg & Co.

**Human Monitoring Ltd.** was founded February 2005 by Dr. Nitzan Rabinowitz, the former CTO of Moonlight, and Ira Dvir, the former CEO and co-founder of Moonlight. Human Monitoring is developing sophisticated video algorithms which include Digital Image Stabilizers and Privacy **Protection** Motion Detectors.
