Web Integrator

Web Integrator: Standard

Integrates eCommerce and RMS

Seamlessly combine internet orders and clients with the existing RMS database. Automatically create invoice, shipping/billing information, and tendered payment. Increase the ease of use with multiple eCommerce packages and help streamline virtual operations.

Web Integrator: Professional

Integrates eCommerce and RMS

Increases the functionality of Web Integrator: Standard by allowing two way communication between the existing RMS database and eCommerce shopping cart. Web Integrator: Professional syncs product descriptions, pictures, and inventory levels to allow complete automation of eCommerce storefront operations. May require back end programming to interface correctly with your particular cart.

Web Integrator: Storefront.net

Integrates eCommerce and RMS

The complete package solution for eCommerce and RMS compatibility. Includes all the functionality of Web Integrator: Professional while being optimized to work with Storefront.net's shopping cart system. Contact Storefront.net for details and pricing.

Web Integrator: X-Cart

Integrates eCommerce and RMS

Full system integration for RMS and X-Cart. Made for X-Cart, Web Integrator introduces complete Professional functionality to help automate production and increase accuracy. An excellent, cost effective alternative to Storefront.net, contact www.KosmosCart.com for details and pricing.

Web Integrator: X-Cart

Includes all the features of Standard plus:

- Supports Sale Pricing
- Inventory quantity adjusts to RMS totals
- Syncs Inventory Pictures, Description, and Price
- Up to Configurable Search Categories per Item
- Matches Categories with RMS

*May Require Back End Programming For Your Particular Cart
Complete eCommerce shopping cart solutions available for select carts.

Web Integrator: X-Cart allows bidirectional communication between Microsoft RMS and your eCommerce shopping cart. Sync inventory levels, descriptions, and pictures with your existing database. Compare list prices with your own or hold online sales. Set configurable search categories for products, improving the organization of the customer shopping experience. Complete eCommerce automation is possible! Eliminate redundant paperwork, costly labor, and the need for two separate merchandise accounting databases.
