

The Fastest Path to Litigation Funding

As a Litigation Funding Broker, you are responsible for getting your clients the funding they need while their legal claim (usually a personal injury or malpractice case) works its way through the courts. If your client is injured, perhaps unable to work, they often need help paying their bills. Your job is to find them the support they need, as quickly as possible. That is where The Funding Exchange™ comes in. The Funding Exchange is a new online market designed to get your funding request in front of Funding Providers most likely to help.

Faster Approval on Your Funding Requests

It is simple. Go online, set up a free account on The Funding Exchange (TFE), and submit the details of your Funding Request. The Funding Exchange then immediately sends your request to Funding Providers, who are given a specific period of time to review it. You only need to submit one request, which is then forwarded to Funds Providers until it is funded. You are notified immediately when your Funding Request has been approved.

Reap the Benefits of Multiple Funds Providers Competing for Your Business

Like eBay® and LendingTree®, you and your client benefit when multiple Funds Providers vie for your business. The result is faster approval times, better terms for your clients and higher commission rates for you.

Set Your Own Brokerage Commission Fee and Collect It Sooner

When you submit your Funding Request, you indicate the Brokerage Commission Fee you desire. Once the Funding Request has been accepted, your Fee is immediately deposited into your account. Nothing could be easier.

Manage the Entire Funding Process Online

Save valuable time by using this fully automated system. Fill out only one funding request. Manage all requests for additional information through the site. Access it from any computer, 24/7. And receive notifications of successful funding requests as soon as they happen.

Find New Clients at The Funding Exchange

As the popularity of The Funding Exchange grows, more and more litigants looking for funding are going to come directly to it. After litigants submit initial details regarding their needs, The Funding Exchange will assign them to a registered Broker within the system. Your job will then be to simply help the litigant through the process, and you will earn a pre-determined brokerage fee for your support.

Access Marketing Support Tools to Grow Your Business

The Funding Exchange will provide you with the critical support you need to grow your Litigation Funding business. Educational materials and online tutorials will help you to better serve the Litigants who need your help.

About The Funding Exchange™

The Funding Exchange is an online market, launched in 2005, through which litigation Brokers and litigation Funds Providers transact business. The Funding Exchange manages the entire funding transaction electronically, enabling litigation Brokers to submit Funding Requests, routing these Funding Requests to the most appropriate Funds Providers, until the Funding Request is approved. The Funding Exchange drastically reduces overall funding transaction time, quickly expediting funds to the Funds Recipient, and promptly distributing the Broker's commission to the Broker.

Litigation brokers submit their Funding Request into The Funding Exchange where it is routed to the most appropriate Funds Provider.
