Your Technology Think Tank.

Trusted Allies.

RazorShark Technologies is built on the premise that the management of information technology for business is like legal advice, accounting, graphic arts, and other bodies of knowledge, in that it is not inherently a do-it-yourself prospect. Smart business people who aren't computer hobbyists need to find quality vendors of reliable hardware, software, service, and support. They need to use these quality vendors as they use their other professional service suppliers, as trusted allies.

RazorShark has strategically aligned itself with some of the industry's leading software solution providers. Our affiliation with Novell, Computhink, and Microsoft enables us to provide today's most innovative and cutting edge technology process solutions.

Our engineers are trained to service all of the products and solutions that we sell. Our pledge to our customers is to translate our passion for our work into workable solutions that will improve the productivity and efficiency of their users. With over 30 years of combined experience, RazorShark is a leading provider of document management and workflow automation solutions. RazorShark combines today's most innovative and cutting edge technology products and systems integration expertise to provide end-to-end work process solutions. Our solutions enable you to solve business problems, lower costs, increase employee productivity, and provide increased customer satisfaction.

Network Consulting.

RazorShark offers a full range of consulting services. We can provide your company with a full range of consulting services to help your company achieve its long term technology goals.

Whether you need help with needs assessment, disaster recovery, training, hardware sales, upgrades, network strategy, implementation or day-to-day system administration, you'll find our years of experience to be an invaluable resource.

Support customers receive assistance in all areas of network design and troubleshooting, system management and day-to-day operations. We understand that not all computer related problems occur during normal business hours, we offer emergency support 24 hours a day, 7 days a week, 365 days a year.

Geography is no obstacle for us. RazorShark can provide the network and systems expertise your company needs to continue smooth operations both on-site and remotely. Contact us today to speak with a consultant.

Aggressive Solutions.

RazorShark designs computing solutions to meet the specific information technology requirements of each individual client. Our engineers enable our clients to rapidly utilize the latest technology available.

RazorShark allows your company to increase productivity and significantly decrease downtime while improving your overall bottom line. With our network design services, we will complete a detailed analysis on your company's current systems to determine whether or not an Enterprise Server is a viable solution to increase productivity and improve your overall bottom line. In some cases it may be more efficient and economical to either outsource your server requirements, such as web and e-mail or purchase a white box custom server that we build on site according to your needs.

We work with our customers to explore, plan, develop and implement solutions that optimize their business operations today while keeping your future growth potential in mind. Whether you require assistance for small or large projects, our solutions provide you with the flexibility necessary to meet almost any business medium.
