Liquid Dietary Supplement

Probiotics are often taken to correct problems in the digestive system, replenish the intestinal flora after antibiotic use, and improve overall digestion. A healthy digestive system is essential to total body health. When nutrients are bio-available, the body can easily use them for proper body function, including improving the immune system, nervous system, and reproductive systems and help relieve problems such as constipation.*

25 years experience in the microbial industry in over 120 countries has proven that the diversity of Effective Microorganisms™ delivers a more effective product that can be used for a broad range of problems and offer numerous benefits.

PROEM•1 Probiotic works differently than other probiotics on the market through synergistic approaches that create an environment in which other beneficial microorganisms can grow while harmful microorganisms will not. This process helps the body to maintain a healthy gastrointestinal tract and may indirectly have a positive effect on the immune system.*

PROEM•1 Probiotic is shipped with a 6 month “Best Used As” date stamped on the bottle. No refrigeration is required. Do not display in direct sunlight. Avoid freezing. 9 ounce bottle. Take three teaspoons per day.

Marketed exclusively through EM America.

*This product has not been reviewed by the FDA and is not intended to treat or cure any health condition. As will all dietary supplements, please consult a health care practitioner before using.
