

ASTER CUCINE Established in 1983, **Aster** is today a young and dynamic company, always ready to interpret the new trends in the market in terms of product and service.

The firm is deeply pervaded by a "**service oriented**" philosophy that has developed a comprehensive company-product-distribution system geared to meet fully the aesthetic and functional requirements of each individual customer.

The painstaking care taken to produce top quality products with an innovative design, a distinguishing mark since the very beginning of our activity, is supported by a network of highly qualified sales outlets with staff who know how to design kitchens with the utmost professionalism, and most of all equipped with a wide range of models in a great number of variants which, together with the availability of made-to-measure articles, and colors produced to match customer samples, practically making a whole world of design possibilities available.

MODERN KITCHENS

The modern kitchen collection by **Aster** contemporary design that with the numerous innovative solutions allows to project an exclusive and unique environment in your kitchen.

TRENDY

Trendy combines in a single outstanding project a collection of products realized in many different materials and colors.

TRENDYWOOD

Only kitchen lovers, those who are enthusiastically involved in creative cooking, treat themselves to this desire.

alnut-wood veneered door oak- veneered in eight colors

TRENDYBASIC

Well-designed and harmonious shapes and lines that are silent and light, but also sturdy and imposing. Simplicity is expressed through homogenous volumes and accurate details. Class and elegance are the winning aesthetic features.

Laminated door in 4 colors

TRENDYCOLOURS

Materials are the product's soul. The unique, resistant and time-proof laminate is cold and intense at the same time. A wide range of colors of unrevealed beauty that turn into silk for your eyes

Laminated door in 34 colors

TRENDYSPACE

Everything revolves around the aesthetic and technological details which eventually lead to excellence. The design is characterized by a firm approach, delicate shapes and very high project accuracy.

Lacquered door in 45 colors

Lacquered door in 45 colors

BRILLA

The mirror of a developing world

Perfect shapes, essential design, functionality in any condition, the purity and resistance of steel: the best expression of one's desires

MODULA

Pure lines, noble materials, timeless shape's..... **Modula** leaves nothing to chance. Rigorous and essential designs are not occasional features. They are designed by kitchen lovers for kitchen lovers within an active and creative industrial tradition.

TIME

A hi-tech kitchen for the evolution of space

Kitchens change. And so does the way to protect their components. Both in terms of the materials they are made of as well as the way in which they are made. The circular nature of this range also defines the evolution of kitchen spaces. Inspired by American kitchens, **Time** has a handy snack bar for speedy lunches and a hob which is no longer confined to the corner, but is now at the centre of large open spaces.

QUADRIA

Functional aspects, refined design

The delicate color of the cherry wood holds the secrets of a project-kitchen with an intriguing charm and functional particulars allow the creation of compositions able to solve the most articulated furniture solutions with a very unique taste. All is "**Quadria**".

KIRA

A kitchen that has changed dimension

The color that raises spirits, the design that provides a superior aesthetic value, experience that binds, the painstaking attention taken in all manufacturing processes: these are the distinguishing features of Kira, a program created to live well in cozy home. A different emotion in your home's changing space. A kitchen to suit the morphology of each and every one of us, with our way of life and with our way of cooking

Palladio

The “PALLADIO “is born where ancient Handicraft techniques and contemporary Modernity fuse in perfect harmony.
“Palladio” is stylistic rigour and elegant nobility, refined creative elegance and color, where space springs to life, brings fascination and beauty.
Palladio exalts the emotion of living.

Aster is the ideal target for people looking for a unique and luxurious design, where every detail fits perfectly in the harmonic project of their own kitchen, but at the same time they ask for quality and care of the finishing. In this section you can browse inside our product discovering some of the aspects that have made Aster's kitchens extremely consistent and qualified.

Structures:

ASTER kitchens are made using 18 cm thick chipboard panels laminated with non-toxic melamine sheets in conformance with European norms E1 on the emission of formaldehyde. Some side panels can be veneered with wood or lacquered like the doors, upon request. The ABS edges are equipped with a rubber strip which minimizes noise when the doors are shut and guarantees perfect seal against dust, odors and insects.

Shelves:

The cabinet shelves, bordered on all four sides, can be positioned at different heights according to your storage needs. They are equipped with an anti-tipping locking device. The thick glass shelves are also provided with stops to keep them securely in place. Chrome steel wire shelves are optional for heavy loads.

Hinges:

The steel hinges and doors are designed to offer a 110°/180° opening. They can be adjusted along three axes and are equipped with an automatic clip-on system to hook them into place and have been tested for 200,000 opening/shutting cycles.

Drawers:

The drawers, are stainless steel or coated, full extension, 50 cm deep; they can be adjusted horizontally and vertically, sliding softly and silently along steel runners built to support heavy loads (30 and 50 kg), with an automatic closing system thanks to self-closing runners, guaranteed for over 100,000 opening/shutting cycles.

Wall cabinets:

The wall cabinets with lift-up doors are equipped with an oleo-dynamic piston-operated opening mechanism.

Wall cabinet supports:

The wall cabinet fittings are adjustable from inside in three different axes and

are tested for a maximum carrying capacity of 140 kg for each pair. They can also be used as an anti-tipping fastening device on all cabinets. The wall cabinet fittings are adjustable from inside in three different axes and are tested for a maximum carrying capacity of 140 kg for each pair. They can also be used as an anti-tipping fastening device on all cabinets.

Sink cabinet:

The bottom of the sink cabinet is covered with embossed aluminum to protect it from water seepage.

Containers:

You can fit the cabinets with indoor lighting and various chromed wire or steel accessories to keep their contents tidy. Detergent container with child-proof safety lock. A variety of waste bins are available, either made of stainless steel, plastic, or even with ecological split boxes. Different cutlery trays are available: plastic, wooden, steel (dishwasher-proof), with optional kitchen tool sets.

Magic corner:

This is our "magic corner", a clever and creative mechanism that solves the problems you have accessing the base cabinet corner.

Accessories:

Space has always been a problem in the kitchen. It can be solved by using fully-equipped, practical tidy and most of all functional cupboards.

Plate drainer:

The plate-drainer, all chrome, allows to change the position of the plates grid with the glass grid for a more comfortable storage.

Basket:

From an agronomical viewpoint, the drawer and basket system turns out to be the most efficient compared to the classic shelf design. The baskets and drawers enable you to use the entire depth of the base cabinet without having to bend over or struggle to reach the items stored right down at the bottom.

Quality

Outsized items

Outsized items ASTER not only offers you a wide range of items in a great variety of models to meet all possible aesthetic and functional requirements, but also manufactures with the passion and care of handicraft methods all made-to-measure items necessary to "furnish" a kitchen perfectly.

Colors according to sample

One of our company's strong points is the wide range of colors available both for the laminated kitchens, the wooden ones, as well as the lacquered ones where **ASTER** can make kitchens to specific color samples as well as in 40 matt, glossy and metallic colors.

5-year Guarantee

Given the high reliability of the products themselves along with the top quality of the materials used to make them, Aster guarantees all products for 5 years

5-year spare parts guarantee

The rapid evolution of products makes finding spares an increasingly difficult task. On the other hand, the certainty as to the future availability of items also allows for the kitchen to be modified at a future stage, without preventing any possibility of making changes or extensions due to new requirements within the home (such as extension or refurbishment work, moving home, etc.). **Aster** guarantees the availability of spare parts for their range of kitchens in the same color and with the same look as the original article purchased or, if the model is no longer being manufactured, the company will come up with a matching alternative to furnish the new kitchen environment
