".....Using these indicators has changed the way I trade for the better and has helped me achieve my retirement income goals in 2005, thanks." Ed Christianson, Pittsburgh, USA" Jan 06

Here's what Daryl Guppy said in his 'Tutorials in Applied Technical Analysis' newsletter (www.guppytraders.com) about Jim Berg's Home Study Course:

"This is a comprehensive guide that takes you step by step through a 2 day trading strategies workshop using Metastock software. This is excellent value and quality work. The workbook is well set out with clear screen shots of the processes under discussion. The full coding steps for all indicators are included, along with detailed explanation of how the strategies are implemented".

"Dear Jim,

.. Unfortunately we have in the past attended so called education seminars only to find out (after we parted with our hard earned cash) that they are only a tease to get you to pay more money to complete the whole course. Unlike your seminar that was a complete course and what's more you at no time gave us false hopes of how easy it is to trade shares but gave us the encouragement to pursue the goal of becoming a home based share trader.

We would also like to thank you for the additional support material that you have made available to us via the e-mails, another refreshing quality of your obvious dedication to helping other traders with their education needs. We look forward with great anticipation to getting started with the ideas and formulas that are associated with your trading strategy...

.. It is great to meet people like yourself who are passionate and genuine about shares and trading and willing to convey your extensive knowledge to others, We look forward to attending further education courses presented by yourself and any further assistance you may be able to offer.

We will and would highly recommend you to any person who is looking for assistance with share trading strategies, and appreciate your willingness to share your knowledge

With the kindest regards Colin & Vicki R

" .. I've also spent a fair whack of dough in the process, 90% of which I would have saved had I been to one of your seminars earlier.

By my calculations, the money saved from doing the above would have resulted in my being able to work at least one day less per week, on average, using your trading methodology. Thank you, Thank you, Thank you... From the bottom of my heart!"
Glen B

"Dear Jim,

I attended your seminar on 11 May and wish to thank you for your superb strategy and logic in analysing the market and determining where there are opportunities. I have attended many in my time and none of them ever had the long- term strategy coupled with the entry and exit points as you have. The position sizing is something that no one talks about and yet it is very important. My compliments on your growth.
- Alvin Scrignar

".. This is the best course on trading that I've attended. I've attended many courses, but Jim is the only lecturer who is prepared to stand by his trading methods. He selects shares on the day of the course, which have a high probability of success in the immediate future. Every attendee can then watch these shares during coming days and weeks and make a judgment as to whether Jim's approach works. Everyone who holds himself out to be an expert should do the same. Jim is a very honest, sincere and straight forward person" - Doug Dew
