Solution Partners

msdn **Microsoft**

adlibsoftware™

Solution Components

With simple MS Office technology...

- It allows for easy upgrades and automatic Table of Contents
  - ◆ Standard features in SharePoint allow you to upgrade your view for publishing in seconds
  - ◆ Add a new chapter, document or spreadsheet and have MS Office and SharePoint 2007 manage your ToC without extra effort on your part

Author and Business Review

Q-Publisher™ makes use of standard SharePoint 2007 functionality for Workflow Routing for review and digital approvals with Avoco Secure and other industry standard eSignature options.

- One 'stop' publishing for PDF, Paper or XML
  - ◆ Impact's Solution uses the same technology for standard PDF or paper
  - ◆ Select the page, paragraph or chapters you want to publish in your MS Office documents and go. Publish from the SharePoint 2007 repository without exporting files or formatting your content beyond your original authoring effort in MS Office

Take the Next Step

We understand the compliance issues that organizations have to deal with day in and day out. Fortunately, many of your most pressing problems can be resolved with Impact Solutions, allowing you to manage critical information across your enterprise.
