

Security Certification for Applications

## What is PLYNT?

Plynt is the most intense security testing and certification for applications

Protecting customer identities and providing a safe transaction environment are the topmost security concerns of Internet merchants.

Plynt offer an on-demand application security check to address these top concerns for the 1 million plus merchants globally.

Rajat Mohanty,  
CEO, Plynt Inc

## Why Test Applications for Security?

- Find and fix holes before attackers spot them. 75% of attacks are on the application notes Gartner.
- Assure your customers that your applications are thoroughly verified for security.
- Ensure your applications meet security standards and regulations.

## Why Plynt?

- The pioneer in Security Certification for applications
- The first Lifecycle Security program in the industry for continuous protection
- Not just scanning, but an intense testing technique refined over 500 tests.

Tackle the top 2 concerns – violation of customer privacy and fraudulent

## Pricing

APPLICATION SIZE	PLYNT CERTIFICATION	CERTIFYING NEW RELEASES
1 - 10 pages*	USD 5000	USD 3000
11 - 30 pages*	USD 10,000	USD 6000
31 - 50 pages*	USD 15,000	USD 9000
51 - 75 pages*	USD 20,000	USD 12000

\* - Consider only the number of pages where user input is taken

The price includes the initial security test, and one confirmatory test after fixing the holes. The Plynt Certificate is issued once holes are fixed and the application meets the Plynt Certification Standard fully. In case further rounds of confirmatory tests are required, they will be charged additionally. The above prices are for remote testing and certification. Get a custom quote for onsite testing.

## How Plynt Works

### “Customer Quote

“The sales cycle was easy, their approach was sound and they did a great job in the execution of the tests.”

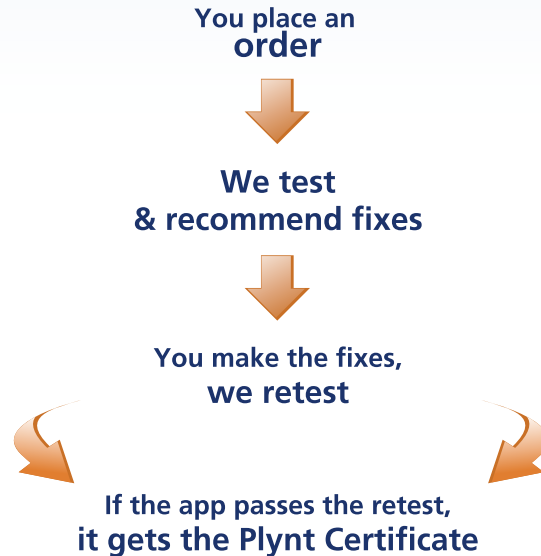

- Tony Rehmer, Franklin Covey

“(Plynt)... have done a very professional and quality job of security testing on one of our main applications. I have since recommended them to many of my contacts in the industry.”

- A business services client

It's a 4-step process towards Plynt Certification:

It couldn't be simpler. We've streamlined the process from ordering to testing to certification to keep it simple and ensure the highest standards of security.

Place your order over Plynt.com, or call us at 1 (703) 871 3940. Choose the dates to schedule the test, and provide us the application details. We study your app, develop test cases and thoroughly verify your app against the Plynt Certification Standard. Our report will describe the vulnerabilities and recommend possible fixes. Once you mitigate the risks, we re-test the app. When all holes have been fixed, we issue the Plynt certificate.

The Plynt certificate is issued to the specific version we test. When you upgrade your application, ensure you have not introduced any holes – schedule a Plynt test and get the new version certified.

## The Plynt Tests

The Plynt Security Test has an extensive set of checks:

- ✓ Authentication weaknesses
- ✓ Stealing confidential data
- ✓ Encryption gotchas
- ✓ Input validation errors
- ✓ OS & Web server holes
- ✓ Violation of business rules
- ✓ Fraudulent transactions
- ✓ Session Management flaws
- ✓ Unsafe settings
- ✓ OWASP Top 10 Vulnerabilities

Security Certification for Applications

## “Customer Quote

“(Plynt)... Provided cost-effective security testing service and exceeded Medmarc's technical expectations. Their professionalism is evidenced by their high”

- Richard Wilkins, Medmarc Insurance

“The deliverable was on time, on budget and outstanding technically”

- A healthcare client

## The Plynt Benefits

- Acquire the Plynt Certificate that demonstrates you meet the stringent Plynt Standardized Certification Criteria.
- Obtain test results within two weeks of starting the test
- Get highest quality tests – benefit from our experience in over 500 tests
- Earn continuous protection – we test and certify the application for each release through its entire lifecycle
- Gain the flexibility of testing your application onsite or remotely
- Go beyond just automated scanning: intelligent penetration testers develop custom test after studying your application.

## Who is Plynt?

Plynt is a Paladion enterprise. It leverages the proprietary technology built over 500+ tests to offer unparalleled speed and intensity in security testing.

Here are a few places you would have likely seen our work:

- OWASP Application Security FAQ, the popular training manual for developers
- Tutorials at RSA Conference 2006, SDWest 2005, ISACA Europe 2005
- Know Your Enemy, 2nd edition from Addison Wesley, that we co-authored
- Palisade, our journal on application security gets a new visitor every 5 minutes
