### **The Siemon Company joins Altima's Manufacturer Certified Stencil Program**

Chicago, Illinois, April 24, 2006 – Altima Technologies, Inc., the leader in Network Diagramming, announces the addition of The Siemon Company to the Manufacturer Certified Stencil (MCS) Program. The MCS Program allows Siemon to offer Visio Stencils of their products from the Siemon website to anyone that wishes to use the Stencils in their diagrams. These Stencils can be downloaded free of charge for all end-users.

“These shapes enable efficient generation of highly effective illustrations for a variety of purposes related to sales, engineering, design and installation of our network cabling systems,” says Dave Valentukonis, Siemon Global Technical Support Manager. “These shapes are invaluable when discussing network cabling solutions and creating proposals. Having these available for download is a value added benefit for our customers and is a key differentiator for our company.”

“We are excited to have Siemon as our newest MCS partner,” says Dustin Wicks, Manager of Altima Mx. “Siemon has long been one of the world’s top IT infrastructure manufacturers and we are very happy to include them as one of our MCS partners. We know that the partnership between Siemon and Altima Mx will provide many benefits to our customers.”

The Siemon Company is a family owned and operated business with over 100 years of experience in the IT infrastructure industry. These 100 years have not dampened the enthusiasm and entrepreneurial spirit of the company. With 20<sup>th</sup> Century values and 21<sup>st</sup> Century vision, The Siemon Company is living proof that hard work, dedication and a dream can take you far.
