Upload Artwork Tips

- 1 Make sure all artwork is at least 300 dpi. The better the resolution, the better the final print!
- 2 If any pictures or graphics meet the edge of your paper, please provide a 1/8 inch bleed on all sides. Bleeds ensure the absence of unwanted white borders.
- 3 Double check your artwork to make sure it is the correct size. Just print a quick copy and try folding it the way you want it. This takes no time at all and will save you possible future hassle!

Call 1-800-My1Stop to get your project professionally designed. We have a staff of professional graphic designers with years of experience designing marketing materials that really pop!
