LearningServer for SharePoint™

Dramatically increase the value of your SharePoint investment now!
If training your enterprise is a corporate imperative, LearningServer is the answer. Created specifically for SharePoint by IntraLearn Software Corporation, the world leader in Microsoft technology-based eLearning applications, this powerful application is taking enterprise learning to a level *never before possible!* Now, all members of your corporate enterprise can quickly get the training they need to align with corporate business objectives and get the competitive advantage that shared knowledge provides.

Transparent Integration

IntraLearn LearningServer for SharePoint is a tightly coupled SharePoint application that operates as part of a SharePoint installation. SharePoint's integrated security and management provide a highly scalable platform to incrementally add learning features as required. Integrated Web Services provide interoperability with existing Learning Management and HR systems.

Target, Track, and Manage Learning

Your enterprise portal platform can now deliver critical training directly to those who need it. Employees can access policy and application training on-demand. Marketing can deliver new product training to all members of the sales channel immediately. Train customers to use new products and services right out of the box. Easily track different types of learning across the enterprise. Keep records of who's taken what live seminars and online courses. Assign courses to specific employees, suppliers, tech support specialists, or even customers! Reports tell learners and managers how they're doing.

Instant-On Content

Learning Server for SharePoint works with industry-standard SCORM and AICC compliant content. This allows you to dramatically reduce time to create and deliver critical training. Easily create and convert content in Microsoft Office products such as Microsoft PowerPoint into highly effective and measurable training. Use commercially available authoring tools to create sophisticated customized courses in-house. Popular third-party courseware can be immediately imported, launched, and tracked.

Add Functionality When Needed

With the powerful LearningServer *Collections*, you can add functionality as needed and do not have to pay for features you don't use. Feature-rich capabilities such as Content Management, Collaboration, Enhanced Management and Career Development can be easily added when needed.

The Company

More than 2,000 organizations deliver eLearning from the IntraLearn platform. IntraLearn Software Corp. is the leading supplier of Microsoft technology-based eLearning applications in the world. With offices in the UK, Brazil, Singapore, and India, IntraLearn software is distributed worldwide through authorized resellers and Learning Service Providers in more than 45 countries and 17 languages. IntraLearn is a Microsoft Gold Certified ISV Partner.

IntraLearn LearningServer for SharePoint

The value of the SharePoint Server platform is dramatically extended by the IntraLearn LearningServer for SharePoint application! Incremental capability, functions, and roles within SharePoint include:

Administrator and Instructor

Auto Install	Transparently installs into existing SharePoint installation. No incremental technology required.
Manage Learning	Launch & Track imported third-party and self-authored SCORM and AICC compliant courses as well as manage a variety of learning events…both online and live.
Customization	Graphics, words, and the entire language set, along with Cascading Style Sheets, can be tuned to customer's desired look & feel.
Web Services	Integrated Web Services enables tight data synchronization and integration with existing ERP, Learning Management, or HR systems.
Increased Efficiency	Assign courses to those who need critical training immediately. From within SharePoint, you can easily provide training for internal use, partners, and customers. Examples include process and safety training for manufacturing, technical training for support staff, corporate policies for managers, customer product training, etc.
Reporting	Built-in reports are available for managers to view course status and performance in addition to active learner grading for whomever in the Enterprise they have been assigned access.

Learner:

Selectable Languages	Individual learners can select a preferred language right from the desktop.
Courses	Learners are presented with a list of courses required for them or chosen by them.
