

AVL Technology Firm Awarded National Contract to Secure Cash N Go ATM Service Fleet with GPS Security Tracking Solutions

EDMONTON, ALBERTA// - Safefreight Technology, a provider of global wireless security and [AVL tracking technology](#), is pleased to announce that Cash N Go has awarded Safefreight Technology with a national contract to secure the service fleet of Cash N Go service vehicles.

Faced with the increasing demand for Cash N Go ATM products and a concurrent increase in security and fleet management requirements, Cash N Go has implemented Safefreight's SmartFleet™ System to enhance their ability to manage their mobile assets. Incorporating advanced wireless GPS tracking, customized security features, and mapping technology, SecurityGuard™ devices were installed onto Cash N Go mobile assets. This solution offers [remote security monitoring](#) and control through the web-enabled SmartFleet™ Manager application. Real-time visibility and monitoring will alert Cash N Go of any security breaches that may arise in the transportation of their sensitive, high-valued cargo.

"We believe our product offers an industry-best solution for mobile asset tracking and are pleased we were selected by Cash N Go over a number of other possible vendors." said Curtis Serna, Chief Executive Officer of Safefreight Technology.

"Our decision to choose Safefreight was based on its strong industry experience and understanding of our requirements," said Ken Nichols, President of Cash N Go. "None of Safefreight's competitors could offer a [fleet management product](#) that met our security, tracking, and productivity needs."

About Safefreight

Founded in 1998, Safefreight Technology is a developer and provider of security-enhanced fleet management technology. Through its SmartFleet™ System, Safefreight provides full vehicle security and visibility through proprietary security technology, 24/7 [GPS fleet tracking](#) and monitoring, control capabilities, and wireless diagnostic sensors. This system offers a perimeter of security that mitigates threats by providing complete situational awareness of vehicles and other mobile assets along with command and control capabilities. As experts in [homeland logistics](#) and [security transportation](#), Safefreight Technology can help to meet your business and security objectives.
