

Security Risk is a function of

- Consequences of a successful attack against an asset
- The Likelihood of a successful attack against an asset

Likelihood is a function of

- Attractiveness of the asset to the adversary
- Degree of threat posed by the adversary
- Degree of vulnerability of the asset

Deter · Detect · Delay · Respond

MISSION

Security Advisers, LLC is dedicated to delivering data confidentiality, integrity, and availability to our clients today. We are devoted to the deterrence, detection, delay and response to all future threats through the application of expertise, advanced certification, education, and our passion for delivering safe, secure computing environments to our government and commercial customers.

COMPANY

Security Advisers, LLC is a Veteran-Owned Small Business established by former government agency Information Technology Security experts to implement pro-active information assurance strategies and methodologies for federal and commercial customers.

Headquartered in Maryland, Security Advisers is a complete services provider that maintains a vendor-neutral approach to sustain objectivity and enhanced service levels to its clients. Security Advisers, LLC specializes in the delivery of high-level security services for government and commercial clients which include regulatory compliance auditing and reporting, IT security policy and design implementation, vulnerability scanning and penetration testing, forensic response and incident handling, HIPAA certification, Sarbanes-Oxley certification, and security education and awareness training services. Security Advisers provides the highest level of personnel for every IT Security need.
