

Corporate Capabilities Statement

Company

Security Advisers, LLC
Worldwide Headquarters
5108 Pegasus Court, Suite L
Frederick, Maryland 21704

Geographical Service Area: CONUS

A Veteran-Owned Small Business

Background

Information Assurance and the federal regulatory environment present challenges that are exponential when compared to commercial enterprises. The stakes are high, resources are always scarce, and budgets must be won and defended.

Security Advisers brings the most talented and creative minds together to solve the intensely complex issues presented in pursuit of compliance. Once achieved, our teams work diligently to maintain this status. Our field operatives are experts in IP behavior and have a deep understanding of Information Technology and its relationship to the constantly changing legislative landscape.

About

Security Advisers is a Veteran-Owned Small Business established by former government Information Technology Security experts to implement pro-active information assurance strategies and methodologies for the public sector.

Headquartered in Maryland, Security Advisers is a complete security services provider that maintains a vendor-neutral approach to sustain objectivity and enhanced service levels to its clients. Security Advisers delivers defensible federal regulatory compliance and information assurance leadership through the application of advanced security faculty and a profound knowledge of the federal regulatory environment.

Mission

Security Advisers is dedicated to delivering data confidentiality, integrity, and availability, to our clients today. We are devoted to the deterrence, detection, delay and response to all future data-related threats through the application of expertise, advanced certification, education, and our passion for delivering safe and secure computing environments to our government customers.

Ethics

Security Advisers believes that a code of ethics is basic to the conduct of Information Assurance. Our ethics govern our actions and attitudes. Our ethics reflect our distinctive status as a government contractor. All actions must be defensible. We are accountable for everything we do. All Officers, employees and agents of Security Advisers are bound to the professional rules of conduct stated below.

- Promote, advocate, and strive for, the protection of data assets.
- Maintain confidentiality except where disclosure is mandated by law.
- Maintain professional and technical standards of excellence.
- Act without discrimination.
- Recognize and avoid conflicts of interest.
- Respect your own self worth, integrity, and dignity.
- Abide by the Law.
- Resist pressures to compromise.
- Deliver as promised.
- Display mutual respect, teamwork, loyalty and cooperation.
- Lead by example.

Experience

Security Advisers has accumulated significant experience in the completion of federal Certification & Accreditation document sets. We have expertise in converting existing SP 800-26-based documents to the latest SP 800-53 requirements. Our work spans the Department of the Interior, Health and Human Services, and other Executive Branch Agencies. Security Advisers specializes in General Support Systems and Major Applications that have poorly defined boundaries, lack of administrative control, or very technical requirements.

We approach the C&A with multiple tools at our disposal. This makes it possible for us to discover long-forgotten infrastructure, pinpoint protocol usage, IP addressing schemes, directory schemas, and other network characteristics. Our advanced security certifications allow us to analyze network traffic to the datagram level. This is very useful in understanding anomalous behaviors associated with Major Applications, network infrastructure, perimeter defense systems, and Intrusion Detection Systems.

Security Advisers has provided design and engineering services to multiple Cabinet-level Agencies consisting of timely responses for HSPD-12/PIV, PKI, and other e-Gov initiatives.

Advanced Security Certifications

Security Advisers employs highly experienced IT Security experts for its field operations teams.

Advanced Security Certifications are required as a condition-of-hire. At least one of these certifications must be from GIAC (Global Information Assurance Certification) which was founded by the SANS Institute in 1999.

Security Advisers invests heavily in the continued education, certification, and development, of its employees and officers.
