

# Millionaire Kids 101

Introduce Your Kids to Money

[www.millionairekids101.com](http://www.millionairekids101.com)

## Millionaire Kids 101

**Millionaire Mindset:** If a mindset is “how” you think, then a millionaire mindset is how a millionaire thinks. The how to think about money absolutely **MUST** come before the “what” to think about money. We discuss how we are going to approach the topic of money and how we learn new concepts.

**What Is Money?:** Is money paper? Is money change? No, money, like everything else in the universe is energy. The first key to understanding how to bring money into your life is knowing what it is and how to attract it.

**How Did Money Get Started?:** We didn’t always have money. We learn how the barter system gave way to money and how we always use the barter system to get what we’re really after.

**What About Work?:** What is work really? Work is really an exchange, energy for money. We will discover the key to giving our best energy and creating the most money in our lives: love.

**Is Having Money Good?:** Kids hear so many conflicting messages about money, mostly from adults who are just as confused as they. Let’s set the record straight once and for all: abundance is a good thing. We will discover the correct attitude to keep money flowing into our lives.

**What About Stealing?:** You will never have a shoplifter on your hands after this segment. We will discuss stealing on the small, “I put it in my pocket” scale as well as the larger, “My boss won’t pay me what I deserve” scale and how that affects the flow of money into everyone’s life.

**What About Giving?:** What are your beliefs on giving to those less fortunate? In this chapter, we will discuss giving and the different ways to give most effectively. We also cover how the cycle of giving works to keep continual abundance in our lives.

**Oops, I Almost Forgot:** Giving can’t be completed without receiving. In every act of giving, someone must receive and in order to keep the giving going, your child must be willing and able to receive. We will discover how this cycle works with our money as well as all the other good things we chose to see show up in our lives.

**What About Greed?:** Too often, the portrait of a wealthy person is painted with the thought that the rich are all greedy. Is that the idea you want to instill in your child? We will discover what greed really is and how we use money as a tool that

we use to obtain other things we really want. Money itself is not the final objective, abundance in all areas of our lives is what we're really after.

**My Million Dollar Ideas:** The difference between those that achieve success and those that talk about missed opportunities is the ability to pay attention to the flashes of brilliance we all have. We will discover how to start documenting that brilliance and putting a high value on our ideas.

**Millionaire Mindset – More About Money:** In this chapter, we'll start to apply the "how" to think to some basic core concepts. The combination of knowing how to think about money, combined with the essentials on what to think prepares your child to make intelligent decisions with their money from day one.

**What About a Paycheck?:** Understanding what paycheck is does not begin and end with knowing what a checking account is. The paycheck stands for the amount of energy we received in exchange for our work. We will learn how to maximize that potential as well as the concept of what a paycheck is.

**What About Paying Bills?:** What are you really doing when you pay bills? Keeping the flow of abundance in your life can be as simple as paying the bills on time and with the proper mindset. Your child will discover the meaning of "bills" as well as the larger concept behind it.

**What About Saving?:** There seem to be 2 schools of thought on saving that we teach children and neither is the correct way to save successfully. In this chapter we will discuss what saving is really meant for and the easy formula to start saving. We will also learn that the best way to make money has nothing to do with saving at all.

**What About Credit?:** Credit has almost become a bad word in many households. Are you raising a child that fears credit or uses credit with no concept of what it actually is? We will learn how to use our credit to actually make us money rather than be a slave to consumer debt.

**What About Spending?:** If money comes back to you as easily as you part with it, what are you teaching your child about spending? In this segment we learn the key to spending with an abundant mindset. We also discuss identifying what we really value and how that is translated through our spending.

**What About a Budget?:** Creating a plan with your money is key in becoming financially free. The key to making this plan work is in identifying what you really chose to make a part of your life. We will discuss the essentials in creating a plan that works.

**Your First Budget:** There's a time to learn and then a time to do. We will create our very own first budget and see how all of the "how's" as well as the "what's"

are working together. Your child will be excited at seeing the power and responsibility of creating their own plan.

## **Millionaire Kids 201**

**What's Next?:** In the second course, we will discover what to do, now that we understand how to think about money. How can we best incorporate what we love doing and being into dollars and success? Your child will learn about work and how to maximize their potential in the following 4 areas.

**Be An Employee:** Working for someone else is where most of us start and the experience should be invaluable if used correctly. What have all successful entrepreneurs done with their time as employees? We will discuss how to expand where we're at and create more value as an employee.

**Be Self-Employed:** Owning your own business can be a wonderful and wealth-building experience, if the essential elements are there. Once you understand what your business plan truly is and how to think about your business, the rest is determined by how much time we'll spend and the value of that time. We will create our own beginning business plan and learn how to implement it and start making money immediately.

**Be An Entrepreneur:** Your child will learn the key that all great entrepreneurs have known and used to their success. We will discover how to build on our first business plan to create our very first project as an entrepreneur. Most importantly we will discover how valuable and powerful our ideas are.

**Be An Investor:** What is the single, easiest way to make more money? That's right, send it out into the world to make you more money. Your child will discover the core elements in investing successfully and how to maximize their investments right now, even with just a few dollars. Imagine what they'll be able to do with more!

**Your Big Plan:** Now that your child understand the basics of creating a business plan as well as the value and power of their ideas, we will discover how to take these 2 principles and apply them to our Million Dollar ideas. This project will show your child

## **Millionaire Masters**

**Masters of the Universe:** The Millionaire Masters course was designed to inspire and challenge your child to think about some of the larger issues our society and our world faces and how they can implement change. We will discover how our

philosophy and our level of responsibility can create awesome changes, even right now as kids. Of course, we will also learn the role of money in these changes.

**Does the World Stink?:** Your ability to change the world starts with your level of belief as to whether or not it matters. If the world “stinks”, if events are uncontrollable, if people are essentially bad or selfish, then what difference does it make? Making a decision about the state of the world and whether or not they can make a difference is the first step to change and personal responsibility.

**Responsible for What?:** In this chapter we will discuss the power that comes to us when we recognize what responsibility really is and what we’re really responsible for. Get ready for some amazing changes at home because your child will have a desire to take on challenges and accept responsibility – because they want too, rather than being talked into it.

**Big Changes:** In this chapter we will discover problem solving skills that your child can implement in the classroom and will still be viable at the office. We will learn how to identify the main problem and how to most effectively take energy away from that problem as well as add energy to its’ solution.

**Money and the Universe:** Of course money can help solve problems. Now we will add the how we think about money and what to do with it segments that we’ve built on to how we solve problems with our money.

**Saving for the Universe:** Your child will learn exactly how to start solving what they have identified as a large problem in their world. The core concepts that they learned in starting a business and being an entrepreneur will help them plan and bring about a strategy for solving this problem with money, and the most effective ways that they can do that.

**The Winter of Your Idea:** Persistence is key to fulfillment. Occasionally when an idea comes across a roadblock, how do you know why? Is it the idea itself, or is it the timing of the idea? Your child will understand why these roadblocks come about and the most important element of making that idea a reality.

**Put it All Together:** What happens when you know how to think about money, what to do with money, how to create a plan and get that plan in motion as well as how best to identify a problem and solve it? Greatness and success is what happens! Your child will understand how to combine the concepts from the first 2 courses with the Masters course and be prepared to be amazed! You never know what exciting things they may have planned.

## **Parents/Teachers Manual**

The Millionaire Kids courses come with a Parents/Teachers handbook to take you through each section and give you further ideas of how you can personalize the activities, how to get your entire family involved and how best to make these courses your own. The best thing about the Millionaire Kids series is that you can learn with your child and make this an amazing opportunity for both of you to grow. Take some time to learn together!
