

FOR IMMEDIATE RELEASE

## **VOICE.SKY™ Launches Hosted Services at CBX 2006**

### ***Revenue-Enhancing Applications for Service Providers***

Spring 2006 Customer Business Exchange, Manhattan, New York - June 14, 2006 -VOICE.SKY™ Communications, a facilities-based carrier with domestic and global points of presence in New York, London, Atlanta, Chicago, Miami, Los Angeles, Boston, Dallas, and Hong Kong, announces the launch of their new hosted service applications for service providers. With VOICE.SKY™ hosted services, service providers can capitalize on the Company's carrier-grade infrastructure to generate revenue through new voice services. From Vonage-like phone services to pre-paid calling card, VOICE.SKY™ provides services for immediate revenue generation. VOICE.SKY's suite of applications includes:

- ✦ **VSKY Calling Card<sup>SM</sup>**  
The calling card market is growing at 25 percent per year. With VSKY Prepaid you too can penetrate this market and offer your own blend of calling card products.
- ✦ **VSKY Dial-Around<sup>SM</sup>**  
With VSKY Dial-Around customers can register their home, office or cellular numbers to make domestic and international calls. VSKY Dial-Around is only available in the United States and Canada.
- ✦ **VSKY Softphone<sup>SM</sup>**  
With VSKY Softphone customers can use their PC/laptop to make calls to both land-line and wireless phones.
- ✦ **VSKY IP Phone<sup>SM</sup>**  
With VSKY Phone customers can use an IP Phone or IP adapter and their traditional phone to make and receive calls to both land-line and wireless phones.
- ✦ **VSKY M-Center<sup>SM</sup>**  
With VSKY M-Center customers can enjoy the benefits of unified messaging.
- ✦ **VSKY Solutions<sup>SM</sup>**  
With VOICE.SKY's solutions service providers can offer applications in a variety of settings including: IP Callshop, College Calling Services (calling cards/dorm phones), Enterprise Calling Services (employee calling plans), Tollfree Services, SOHO Services, International Telephone Numbers, and Collect Call Services.

VOICE.SKY's flexible platform allows Service Providers, Institutions and Enterprises to offer a wide variety of feature rich applications to serve various markets and customers while at the same time preserving the service provider's corporate identity through VOICE.SKY's private label offering, and greater control of their revenue model by allowing clients to establish their own retail rates or use their own routes. In addition, a dedicated Research & Development team allows VOICE.SKY customers to enjoy ongoing product, service and feature releases, at no additional cost, allowing service providers to continue to deliver value to their customers.
