

LockLizard Protector

HTML, Flash, Text and Image Security with Digital Rights Management

Protect your HTML files, E-Learning Courses, PDF documents, Images, Flash, and Text files from unauthorized copying, printing and distribution. Control how they are used, by whom, for how long and when.

Protect your company's revenue stream.

Extend your markets and effortlessly gain additional revenues.

Lizard Protector was made specifically for publishers selling e-learning courses, manuals, and documents, or that have Intranets, Extranets, and web sites that contain high value information.

It protects your information (HTML, images, text, flash) from unauthorized copying, sharing, modifying, printing (including how many times), and saving, with US Government strength encryption and Digital Rights Management.

Control who views your information - where, when, and for how long (days, months, years or forever).

Revoke access to your information in real-time, even after distribution. Maintain full control at all times.

Subscription Services

If you sell subscription services, LockLizard's unique concept of publications ensures minimum administration overheads and enables you to effortlessly manage your customer base. Whole bundles of documents, courses, and web sites can be managed in a single group.

When a subscription license expires your subscriber will have to renew it before they can continue using your information. You therefore retain full control over your information at every stage and ensure customers continue to pay license fees when they are due.

Easy to use

A simple to use GUI lets you choose the files you want to protect and apply usage rights to. A simple to use pre-configured web-based administration system lets you control customer access to your protected information.

Complete Information Security

Lizard Protector ensures the best security for your information. Unlike weak and unmanageable password mechanisms Lizard Protector uses public key technology with strong AES 256 bit encryption and a real-time web based licensing system.

Benefits

Gain additional revenues. Customers now have to buy whereas previously they may have obtained your content for free.

Reach new markets. Sell products (e-learning courses, manuals, etc.) that are accessible for a limited time period at a lower cost, rather than being available forever, enabling you to reach new markets that are price sensitive.

Reduce the cost of distributing confidential information. This can now be done electronically now that you are always in control of who can view your documents and what they can do with them. Now you have the convenience and cost savings of online business processes with more secure and reliable electronic document exchange.

Ensure greater compliance with government privacy regulations for electronically distributed information

Securely control information you publish on your Intranet or Extranets. No more passwords to manage, support, or that can be disclosed. Information can't be copied and pasted, printed, or saved, and given to others.

Complete control over your IPR. Achieve full control over how your information is used. Ensure your information is not printed, copied, shared or modified without your permission. Revoke information when you decide it should no longer be available. Copyright and trade secrets are always maintained.

Simple method for controlling access to and use of e-learning courses, manuals, documents, flash files, and commercial and confidential web pages

Features overview

- Complete and secure control over information usage - viewing, printing (+ no. of times), copying, saving, etc.
- Works with HTML, HTM, SWF, GIF, JPG, PNG, TIF, TXT, CSV files. Includes PDF and Word to HTML converters
- Disables Windows print screen, copying, modifying, printing and saving in unprotected mode by default
- Expiry dates – prevent information from being viewed after a specific date – ensures latest version is always in use
- Customer expiry - you decide how long your customers can view information that never expires
- Instant user revocation - terminate your customers access to information instantly
- Offline / online access management - control how long a customer can access your information offline
- Real-time web based licensing control – issue and manage customers, publications and products online
- Transparent real-time web based customer authorization
- Persistent end-to-end protection throughout your information's life-cycle
- Complete control over information security inside or outside the firewall, online and offline
- Customisable access denied and expiry message text and landing URLs, support email address and splash screen
- 5 minutes to set up - existing customer information can be imported and no configuring of servers is required
- Simple to protect information (just select the files you want to protect in the Administrator GUI and apply usage rights to them), simple to use, simple to administer
- Complete integration with your e-commerce system
- Completely managed system (fully hosted by us) or hosted on your own server
- No limit to the amount of information you protect or the number of customers that subscribe to your service
- FREE Viewer software (nothing for users to purchase)
- Bullet proof protection - public key technology and US Government strength encryption (AES 256 bit)
- No passwords to send, manage, enter or forget or disclose
