Staff Station's Productivity Improves Greatly
After The Implementation of Clearview Staffing Software Solution

Dallas, TX – June 15, 2006 - Staff Station, LLC of Memphis, Tennessee is a full service health professional staffing and recruitment firm that was looking for a staffing solution that would help them increase efficiency and lower their operating costs. Staff Station went live with Clearview Staffing Software's TSS on May 1, 2006 and is already seeing their productivity and customer service improve at an amazing rate. David Sweeney, the President of Staff Station said that his team is using TSS with complete proficiency in just one month after implementation.

Sweeney said, "One of the main reasons we chose Clearview was because of their 100% Web based solution. This allows us to have access to our information anywhere, at anytime. Another deciding factor was the money we saved by not having to purchase expensive software or hardware."

One more reason for their choice was the fact that TSS is totally dedicated to the medical staffing industry. According to Sweeney, "Clearview understands the nuances of dealing with medical facilities and professionals…something the general staffing software solutions we looked at couldn't provide. TSS' ability to quickly and accurately track a nurse's availability is just one example of Clearview's understanding of the medical staffing industry." Sweeney stated that TSS allowed him and his staff to spend more time on placing the right medical professional with the right job and cut down on menial tasks and scheduling errors. This increased efficiency has also helped them provide better customer service.

Sweeney and his team are especially enthusiastic about the Document Management feature in TSS. "We are able to instantly email or fax the license and certification documents of our professionals from within TSS directly to our client. This feature saves us hours of phone calls and searching through piles of paperwork. I plan to use this as one of our selling points on Staff Station's Website, marketing material, and recruiting," said Sweeney.

About Staff Station
