

GTT Announces Availability of Graphics Tablet Patent Portfolio

Portland, Oregon (17 July 2006) – Global Technology Transfer Group, Inc., (GTT) is pleased to announce the availability of an important patent portfolio related to the field of coordinate detection utilized extensively in graphics tablet systems and interactive children's books.

The portfolio consists of seven patent families and includes coverage for the U.S., Japanese and EU markets. The patents were developed by a leading, Japanese Global 500 consumer electronics company and GTT is proud to be the exclusive representative. GTT has prepared a detailed portfolio marketing report highlighting the patents, technology and market using its proprietary patent analysis methodologies.

For more information regarding these portfolios, please contact Kari Lubitz, Communications Department, Global Technology Transfer Group, Inc.
