

The DH brings needed realism to pitching practice.

“Revolutionary New Batting Figure Is Helping Coaches Improve Their Pitchers’ Pitch Location And It Will Work For YOU Too!”

“The DESIGNATED HITTER is the best product of its kind on the market...realistic, sturdy, easy to move, and in one piece.”

-- Geoff Zahn, Former major league pitcher and University of Michigan Head Baseball Coach

“I have searched for years for a tool that could be used to provide a hitter's reference for a pitcher... This product is the best I have found.”

Introducing The First Life-Like, Professional Batting Figure Designed to Last...

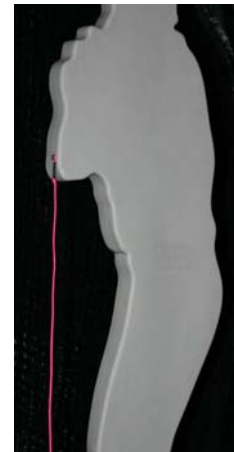

Keep Your Players Safe.
Flat surface and beveled edges minimize the chance for pitches flying off at odd angles and hurting your catcher.

A Specially Designed Engineered Base ensures the figure remains up right under the harshest of practice conditions. Yet, makes it easy to move the figure around in the batter's box to mimic any hitter's stance. Never interrupt pitching practice for a "fallen" batter again.

With The DH, You Have A Batter In The Box All The Time. Attention to details ensures your pitchers see the hitter's **KEY LOCATION POINTS**... knees, elbows, hands... so they can perfect pitch location and take control of the strike zone.

The Only Batting Figure With An Inside Pitching Aid. Unique Inside Pitch Attachment (IPA) takes the guesswork out of inside pitch location and ensures pitchers improve their command over the inside half of the strike zone.
