love your body™

Why Nutralove (Curious?)

EXCITING NEW PRODUCT LINE

Connecting health and beauty, Nutralove is part of the next trend in hair salon products. Many manufactures of hair products have extensive knowledge in soap and to a greater degree marketing. Nutralove is first and foremost a vitamin and supplement company that is now introducing its hair products that not only make your hair look better but make your hair healthier.

Nutralove has even been awarded a United States patent pending for its Irresistible shampoo line. Nutralove has also been granted seven FDA registration numbers in the Kingdom of Thailand for its vitamins.

More than simply a new brand in the United States, Nutralove is also introducing a new concept that merges unique patent pending delivery systems with the connection that health has with beauty.

What's New (Very Cool and Patent Pending!)

Our new shampoo product for salons, permits the customer to customize their shampoo through our unique patent pending delivery system. More shine, no problem, more conditioner, no problem, more silk protein or topical b vitamins again no problem. The customer can even combine any combination of individually available activators. No longer is the customer limited to premixed shampoo products.

Because you want more business..

At NutraLove® We know that even the best and most innovative products need to be promoted. That is why we attract the customer with bright, informative and memorable packaging. But it doesn't stop there, the customer is engaged at the point of purchase by our hang tags that ask the question "Do you Know?" Followed up by the answer which will inform and motivate the customer to purchase the NutraLove brand. Once the consumer has tried our products, repeat sales are assured because of our innovation in serving individual health and beauty needs.

At NutraLove®, we are always innovating to bring new exciting products that enhance your health and beauty from the inside out. Love your body™ with the perfect blend of science and nature.
