UNIT INVESTMENT TRUSTS

Delta Global Canadian Energy Trust, Series 2

FACTCARD

Portfolio Objective

The Trust seeks to provide a high level of income with a secondary objective of providing the potential for capital growth.

Risk Considerations

As with all investments, investors can lose money by investing in this Trust. The Trust also might not perform as well as expected. Stock prices can be volatile. The value of your investment may fall over time.

The sponsor does not actively manage the portfolio. The Trust will generally hold, and may continue to buy, the same stocks even though the stock's outlook, market value or yield may have changed.

Share prices or dividend rates on the stocks may decline during the life of the Trust.

Issuers of securities held by the Trust may be unwilling or unable to make principal payments and/or to declare distributions in the future, may call a security before its stated maturity, or may reduce the level of distributions declared. This may result in a reduction in the value of your units.

The financial condition of issuers of securities held by the Trust may worsen or their credit ratings may drop, resulting in a reduction in the value of your units. This may occur at any point in time, including during the primary offering period.

The Trust will invest in the units of Canadian Energy Trusts. The Trust's investment in Canadian Energy Trust units involves risks which may differ from an investment in common stock of a corporation. Canadian Energy Trust units represent an equal fractional beneficial interest in such trust and often include provisions in their organization documents that limit their liability to unitholders. As a result, the ownership of the Canadian Energy Trust may not provide unitholders with the statutory rights normally associated with ownership of shares of a corporation. In addition, Canadian Energy Trusts generally do not guarantee minimum distributions or even a return of capital and are subject to the risk that tax changes or recharacterizations will substantially affect the Canadian or U.S. tax consequences of owning such trusts. Canadian Energy Trusts are subject to the risks associated with other energy-related companies including the possibility of wide fluctuation of energy prices. See "Investment Risks-- Energy Sector risk" below.

The Trust will invest in foreign securities. The Trust's investment in foreign stocks presents additional risk. Foreign risk is the risk that foreign stocks will be more volatile than U.S. stocks due to such factors as adverse economic, currency, political, social or regulatory developments in a country, including government seizure of assets, excessive taxation, limitations on the use or transfer of assets, the lack of liquidity or regulatory controls or differing legal and/or accounting standards. The Trust's investment in Canadian Royalty Trusts subjects it to additional risks to which it might not otherwise be subject if it invested in similar types of income trusts that are available through issuers in the United States. In addition, the Trust's investment in Canadian Energy Trust's may expose unitholders to additional risks that may be associated with Canada or the Canadian securities markets. Inflation may decrease the value of money. Risk Considerations are continued on page 2.

Principal Investment Strategy

Under normal circumstances, the Trust will invest at least 80% of the value of its assets in Canadian royalty trust units headquartered in Canada whose principal business is the production of oil and natural gas and that list their shares on exchanges in the United States and/or Canada ("Canadian energy trusts"). Canadian royalty trusts are generally structured to own debt and equity of an underlying entity that carries on an active business, or a royalty in revenues generated by the assets thereof. The Canadian royalty trust's structure was developed to facilitate distributions to investors on a tax-efficient basis. The Canadian energy trusts included in the Trust will invest in Canadian oil and gas trusts that have a direct or indirect interest in oil and gas properties. These trusts generate cash flow through the production and sale of underlying crude oil and natural gas reserves.

Canadian Royalty Trusts

- Similar to real estate investment trusts ("REITs") in the U.S., Canadian royalty trusts pay the majority of their earnings to shareholders in the form of dividends. Unlike U.S. energy trusts, Canadian energy trusts are active operating companies. Canadian energy trusts can issue new stock or debt in order to fund acquisitions as well as expand their reserve lives.
- The Trust is designed to provide monthly income according to the payout schedules of the holdings within the Trust.
- Because this Trust is focused on oil and gas producers, measurable fluctuations in energy prices typically impact dividend payouts as well as share prices. Energy prices have historically correlated with payout levels from Canadian energy trusts like those held in this portfolio.
- Delta Global believes that today's market for crude oil is very tight, with little difference between global supply and demand. Barring unusual economic circumstances, Delta Global expects the global oil market to remain tight throughout the two-year life of this Trust, resulting in possibly stable or growing payouts from energy trust vehicles.
- The natural gas market has dropped dramatically in price, falling by nearly two-thirds from its post-Hurricane Katrina peak. While this decline has resulted in lower payouts and share prices from many of the Canadian energy trusts for which natural gas production constitutes a large portion of their businesses, Delta Global believes these events have led to a more attractive entry point into natural gas-related holdings than just six months ago. Ultimately, Canadian energy trusts represent an interesting way to gain exposure to crude oil and natural gas.

Security Selection

Delta Global has selected a portfolio of Canadian energy trusts through a process of bottom-up company analysis and due diligence. Delta Global has selected companies based on the quality of their reserve life, payout ratio, dividend history, operating costs, growth rate of shares outstanding, the effective use of capital and, when available, the findings of the Dominion Bond Ratings Service (DBRS), Canada's premier credit rating agency.

Delta Global Advisors, Inc.

Delta Global Advisors, Inc. is a registered investment adviser ("RIA"). Delta Global's founder and president, Charles "Chip" Hanlon, is a contributing writer for TheStreet.com and a widely-followed authority on foreign markets, currencies and commodities. He is also writing a forthcoming book on global investing for FT Prentice Hall publishing. Delta Global is focused on providing specialized global investment strategies and consulting on specialized investment themes with institutional clients.

Risk Considerations, Continued

Inflation may decrease the value of money. Inflation may lead to a decrease in the value of assets or income from investments.

The Trust includes securities issued by companies in the energy sector. Companies in the energy sector are subject to volatile fluctuations in price and supply of energy fuels, and can be impacted by international politics and conflicts, including the war in Iraq and hostilities in the Middle East, terrorist attacks, the success of exploration projects, reduced demand as a result of increases in energy efficiency and energy conservation, natural disasters, clean-up and litigation costs associated with environmental damage and extensive regulation.

The Trust invests in stocks issued by small-cap and mid-cap companies. These stocks customarily involve more investment risk than stocks of larger capitalization companies. Small-cap and mid-cap companies may have limited product lines, markets or financial resources and may be more vulnerable to adverse general market or economic developments.

Please see the Trust prospectus for complete risk information.

Portfolio Summary

| | |
|--------------------------------------|-----------------|
| Inception Date | August 10, 2006 |
| Termination Date | August 27, 2008 |
| Initial Offer Price | \$10.00 |
| Minimum Investment | \$250.00 |
| Number of Issues | 22 |
| Estimated Annual Income Distribution | \$0.8340 |
| Distributions*, if any | Monthly |
| CUSIP (cash payment) | 18385C472 |
| CUSIP (reinvestment accounts) | 18385C480 |
| CUSIP (fee-cash) | 18385C498 |
| CUSIP (fee-reinvest) | 18385C506 |
| Ticker | CCRTBX |

Distributions, if any, will be made monthly commencing September 25, 2006.

* Estimated annual income distributions will fluctuate due to unitholder redemptions as well as securities in the portfolio being sold or called prior to maturity. Distributions are also subject to the ability of issuers to make principal, interest and dividend payments in the future.

Sales Charges

The sales charge ("S/C") is based on a \$10 per unit offering price.

| | Amount Per Unit | Percent of Offering Price |
|----------------------|-----------------|---------------------------|
| Initial S/C | \$0.100 | 1.00% |
| 1st Yr Deferred S/ C | \$0.245 | 2.45% |
| C&D Fee | \$0.050 | 0.50% |
| Total S/C | \$0.395 | 3.95% |

The deferred sales charge will be deducted in monthly installments on the last business day of May through July of 2007 or upon early redemption.

For unit prices other than \$10, percentages of initial and deferred sales charges will vary. Early redemption of units will still cause payment of the deferred sales charge.

Volume Discount Breakpoints

The following reductions are a % of the Public Offering Purchase Amount Price.

| | |
|---------------------|-------|
| Less than \$50,000 | 3.95% |
| \$50,000-\$99,999 | 3.70% |
| \$100,000-\$249,999 | 3.45% |
| \$250,000-\$499,000 | 3.20% |
| \$500,000-\$999,999 | 2.45% |
| \$1,000,000 or more | 1.75% |

UITs are fixed and not actively managed. You can lose money by investing in the Trust. An investment in this fixed portfolio should be made with an understanding of the risks involved with owning Canadian royalty trusts. Industry predictions may not materialize and securities selected for the Trust may not participate in overall industry growth, if any. There is no guarantee that the portfolio will achieve its investment objective. The economic condition of the issuers of the securities in the portfolio as well as the stock market, in general, may worsen and therefore reduce the value of the units of the portfolio. It is possible for you to lose money investing in these portfolios.

This UIT is a long-term strategy, and investors should consider their ability to invest in successive portfolios, if available. There are tax consequences associated with an investment from one series to the next. Investors should consult their tax advisor to determine tax consequences associated with an investment from one portfolio to the next. Units of the portfolio may be well suited for purchase by Individual Retirement Accounts or other qualified retirement plans. Consult your attorney or tax advisor regarding tax consequences associated with units held outside one of these tax-deferred vehicles. Claymore Securities, Inc. does not offer tax advice.

Investors should consider the investment objectives and policies, risk considerations, charges and expenses of the UIT carefully before investing. The prospectus contains this and other information relevant to an investment in the Trust. Please read the prospectus carefully before you invest or send money. If a free prospectus did not accompany this literature, please contact your securities representative or Claymore Securities, Inc., 2455 Corporate West Drive, Lisle, IL 60532, 800-345-7999.
