

# Autumn Make Up

## Steps

### 1 Skin

I unify, giving colour, in a lighter tone, to the skin.  
I apply light foundation, very fluid, over the entire face and in the area around the eyes, so as to give my make-up a natural and transparent character.

### 2. Eyes

I dress the eye in black, creating a smoke effect with the black eyeshadow on the upper eyelid and below the eye. I mark and load the eyelashes with black mascara, applying khol eye liner pencil around the inner contour of the eye to make it more mysterious.

### 3. Mouth

Using light foundation, I cover up the lips' natural colour. I apply the orange lipstick only in the centre of the mouth, for a touch of colour, so that the eyes take centre stage.

## 4. Cheeks

And finally, I give my autumn touch, applying orange, in circular fashion, with the cream rouge, thus creating a make-up effect with a brilliant finish.

Final Result

## Tips & Tricks

1. Before applying cosmetics, moisturise the skin using very fluid creams.
2. For more of a natural effect, use the foundation as a corrector, applying it around the eyes and where necessary (where there are imperfections) with your fingers.
3. For curvier eyelashes use a curler and then apply mascara.
