

# Solar Electric Power Association

Electric utilities and the solar industry are joining forces to create solutions to help meet our country's energy needs. SEPA is a unique network of more than 100 companies, including 50 utilities, that are sharing experiences, knowledge, and lessons learned about solar programs, policies, and technologies. If you are looking to expand your understanding about solar electric power and how it can be used by you and your customers, SEPA membership is right for you.

SEPA's mission is to facilitate the use and integration of solar electric power by utilities, electric service providers, and their customers. To achieve this mission, SEPA:

- Provides tools to utilities and electric service providers supporting the use and integration of solar.
- Fosters business to business networking.
- Shares information on solar electric technologies, applications, and programs.
- Evaluates and reports on policies, regulations, and legislation.

## SEPA'S UTILITY MEMBERS:

Share experiences and lessons learned with more than 50 other utilities.

Stay up-to-date on solar technologies and market trends.

Receive guidance on solar program development

Learn about proposed legislation and regulation that could affect utilities.

*"SEPA has been the vehicle to provide us with insights into the value of PV, and through our membership we have made many invaluable contacts in the solar industry to help us plan for, and deliver, what many of our customers desire."*

- Carl Stegrist, Senior Renewable Energy Strategist, We Energies

*"SEPA has done an excellent job of identifying and responding to the needs of utilities participating in or with the solar industry. Their programs and services are tailored to bridge the gap between utilities (and utility customers) who want to go solar, and the industry that wants to provide products and solutions. For utilities that are exploring solar energy as part of their portfolio, SEPA's organization, networking opportunities, and forums for the exchange of lessons learned is unmatched."*

- Jon Bertolino, Superintendent, Renewable Generation Assets, Sacramento Municipal Utility District

For information about how to join SEPA's utility network, visit [www.SolarElectricPower.org](http://www.SolarElectricPower.org) or email Emily Brown at [ebrown@solarelectricpower.org](mailto:ebrown@solarelectricpower.org).
