The Business Challenge

Challenged with changing requirements for Compliance and Regulatory Publishing, and the need to keep up with competitors places a great strain on budgets and manpower resources. IT is continually faced with the need to upgrade as new versions of technology are issued.

Impact's Value Proposition

We understand the compliance issues that organizations have to deal with day in and day out. Fortunately, many of your most pressing problems can be resolved with Impact Solutions, allowing you to manage critical information across your enterprise. As a result, we offer significant cost saving over in-house or competitive solutions.

Partners

Cost Effective Deployments

We have consultant with deep experience in deployment of EMC Enterprise Software. In addition, we have developed special tools and products to make deployment go faster and smoother. That is why we can support our claim to save at least 25% of the time it normally takes companies to install EMC² Software.

High Efficiency Implementations

With high-speed communications infrastructure in our Montchanin, DE and Pune India offices, Impact Systems can work around the clock, using these global resources in different time zones to help minimize the total elapsed project time.

Versatile Support Service

Our broad domain expertise, as illustrated by some of our representative consulting engagements makes it possible for us efficiently serve your needs for ongoing or incremental software support. We have experienced consultants who grew up in the process industries located nearby.

For example, we have:

- ◆ Installed and configured an ESG Documentum D5 Federation with replication and firewalls for a pharmaceutical joint venture.
- ◆ Developed a corporate document management system, based on ESG Documentum's Compliance Manager application, for a global chemical and health-care company.
- ◆ Hosted and managed ESG systems for pharmaceutical firm's manufacturing, sales and regulatory lines of business.
- ◆ Replaced costly systems with a cost efficient regulatory publishing solutions for three top pharmaceutical firms.
- ◆ Developed a site-based forms repository for the largest manufacturing facility of a Fortune 100 company.
- ◆ Architected ESG GXPharma to DCM 5.x content migrations for several firms on MS Windows or UNIX platforms.
- ◆ Developed an Electronic Lab Notebook based on Lotus Notes for a global Research and Development Organization for a Fortune 100 company.
- ◆ Developed global customer relationship management systems for two Fortune 100 companies.
- ◆ Developed a web-based system for tracking the corporate TQM program implementation at a Fortune 100 company, a foundation to our Q-Track offering.
