# Press Release

## **American Garage Floor adds Tuff-Seal Tiles**

*American Garage Floor is pleased to announce they will now be offering Tuff-Seal Interlocking Watertight Garage Tiles.*

**Anderson, IN (PRWEB) November 14, 2006** -- American Garage Floor, a leader in distribution of tested garage flooring is once again proving why they are the leader in garage flooring solutions. To give consumers a greater selection they have added a patented, watertight garage tile solution from Tuff-Seal to their product line.

### **Tuff-Seal Tiles have a patented, watertight, interlocking joining system!**

Each garage flooring brand brought to the consumers by American Garage Floor provides another solution for the consumers. Many consumers had been requesting a garage tile product that is actually watertight without any coatings or sealants. Tuff-Seal tiles are the answer.

Tuff-Seal Advanced Interlocking Floor Tile is easy to install. Its unique joining system permits tiles to be laid quickly and easily on any firm, flat surface using only a mallet, utility knife and other common tools. Most installations require no adhesive, just overlap, tap and its done!

Tuff-Seal's 1/4" (6.5mm) thickness provides for unmatched durability. Yet it's flexible enough to be used over uneven floors, providing a cushioned surface that's more comfortable to stand and work on than concrete, epoxy coatings and rigid plastic tiles.

Tuff-Seal is quiet, warm, fire and chemical resistant, flexible and will not crack. Tuff-Seal has the look and performance to enhance any interior application.

### **Quality products make American Garage Floor the only smart choice!**

Instead of just carrying one or two garage flooring products, American Garage Floor now has four unique garage floor brands for consumers to choose from. They currently offer; [Better Life Technology Pads](#), [Lock-tile](#), [SwissTrax Tiles](#), and now [Tuff-Seal Tiles](#).

Keep in mind, these are not just items they have found to bring to you and sell for a profit, no, these products have been tested and approved by the installation specialists at American Garage Floor to provide the quality of garage flooring that is needed.
