

350,000 Healthcare Professionals Can't Be Wrong!

Now, more than ever before, people are taking proactive steps to better their own health by taking nutritional supplements. Healthcare providers are taking notice, wanting the most up-to-date and authoritative information available. The **Physicians' Desk Reference** is the only professional and unbiased compendium of nonprescription drugs and dietary supplements distributed to healthcare professionals seeking credible information. In fact, more than 78% of these physicians, pharmacists, chiropractors and nurse practitioners have reported their overall satisfaction. The **Vemma Nutrition Program** is listed in the 2005 edition of the PDR® for Nonprescription Drugs and Dietary Supplements™. If prestige can be measured, this is the distinction that sets Vemma apart from other nutrition programs.
