

Background

Privately-held IRIS integrated risk management ag is a leading provider of risk and financial analysis infrastructure to the banking, insurance and corporate treasury sectors. Founded in 1992, IRIS looks back to a long experience in these fields.

Product & Services

riskpro™ is an advanced and easy to use financial analysis infrastructure covering Market Risk, ALM, Funds Transfer Pricing, Economic Capital Risk, Risk Adjusted Performance, Liquidity Risk, Dynamic Simulation/Budgeting, Historical Analysis, Regulatory Reporting, Credit Risk Analysis, Basel II, operational risk and IFRS (IAS 32 & 39). **riskpro™** is currently the most unified and integrated financial analysis infrastructure in the market, providing fully consistent results with "Swiss precision". The modularity of **riskpro™** allows the installation of single domains (e.g. ALM only) which can be unified with additional modules at any time. **riskpro™** runs standalone or as a client/server version allowing institutions to use it also as an ASP (Service Providing/Outsourcing).

riskpro™ can be used both for conventional and Islamic banking.

IRIS' own ability of high quality execution is well appreciated by customers and prospects. On top of that highly skilled and multilingual professionals hold regularly product training at IRIS' own academy (www.irisacademy.com) or upon request at customer's site. Many qualified IRIS partners support the worldwide activities covering also regional needs and offer services in local languages.

Staff

90 completed by over 50 **riskpro™** knowledgeable consultants from IRIS Partners.

Company Success

Over the last years IRIS' growth increased at a yearly rate of 20% in terms of employees and 25% in sales. Over 30% of the company's turnover is reinvested in Research & Development.

References

riskpro™ is used today by over 220 independent institutions in 20 countries. They range from small banks to large organizations, for example:
