# Press Release

## **American Garage Floor adds SelecTech Garage Tiles**

*American Garage Floor is pleased to announce they will now be offering SelecTech Wood Grain & Stone Pattern Garage Tiles.*

**Anderson, IN (PRWEB) December 11, 2006** -- American Garage Floor, a leader in distribution of **tested garage flooring** is once again proving why they are the leader in garage flooring solutions. To match the demands of consumers requesting a greater selection they have added the stylish garage tile solutions from SelecTech to their product line.

### **SelecTech garage tiles all have a unique and stylish design!**

Each garage flooring brand brought to the consumers by American Garage Floor provides another solution for the consumers. Many consumers had been requesting a garage tile product with a wood grain or stone pattern. SelecTech tiles are the answer.

One of the hurdles that faced American Garage Floor while testing different wood grain and stone pattern tiles was the wear factor. It seemed that any tile with a stylish design could not stand up to the rigors of the garage or high traffic floors.

The answer came with the testing of SelecTech tiles. At 5.5 lbs. per tile, and 9.53mm of thickness, the SelecTech floating floor system has the mass to remain fixed in position even with heavy traffic and abuse. SelecTech flooring tiles are manufactured using recycled PVC materials. They have also been designed with an innovative interlocking edge system to remove the need to glue the tiles to the floor and greatly decrease the cost of installation.

### **Quality products make American Garage Floor the only smart choice!**

Instead of just carrying one or two garage flooring products, American Garage Floor now has five unique garage floor brands for consumers to choose from. They currently offer; [Better Life Technology Pads](#), [Lock-tile](#), [SwissTrax Tiles](#), [Tuff-Seal Watertight Tiles](#), and [SelecTech Stylish Tiles](#).

Keep in mind, these are not just items they have found to bring to you and sell for a profit, no, these products have been **tested and approved** by the installation specialists at American Garage Floor to provide the quality of garage flooring that is needed.
