INNOVATIVE FLUIDICS TO RENAME COMPANY NUVENTIX

One year anniversary of Georgia Tech spinout marked by new name

AUSTIN, Texas (Dec 13, 2006) –Innovative Fluidics, Inc., an Austin-based electronics thermal management solutions company announced today, that it has changed its name to Nuventix, Inc.

“I believe our new name better reflects the revolutionary nature of the thermal solutions we offer,” said Jim Balthazar, President and CEO of Innovative Fluidics. “Our customers tell us that we have developed the most significant advancement in thermal management since the fan, and our new name helps reinforce that.”

Nuventix electronics cooling solutions aren’t limited by traditional restraints, such as form factor, so they can be integrated into virtually any package. With unlimited flexibility in moving air different directions, the SynJet™ line of cooling devices radically extend the limits of conventional cooling and provide unprecedented opportunities for new and innovative electronics systems design. No longer will engineers be hamstrung by traditional thermal limitations. With total form factor flexibility, hot spots can be eliminated anywhere in a product.

About Nuventix:

Nuventix, Inc, is an Austin, Texas based, venture backed firm that is revolutionizing thermal management of consumer electronics, LED lighting, medical, telecommunications, automotive and other electronics with patented, highly adaptable, quiet, and reliable, cooling devices that efficiently, effectively — and directly — dissipate heat from any surface. The highly patented SynJet™ technology enables the most reliable and flexible air cooling solutions available today.
