## SIGNATURE HARDWARE MOVES TO LARGER FACILITY

*Company's recent growth prompts move to building with more warehouse, office, and showroom space.*

### **ERLANGER, Ky (January, 2007) -**

Decorative hardware, plumbing, and lighting supplier Signature Hardware is pleased to announce the grand opening of its new facility at 2700 Crescent Springs Pike in Erlanger. With 86,000 square feet of space, this building houses all warehouse and office operations for the company at a single location.

The expansive 75,000 square foot warehouse area is equipped with six loading docks for efficient shipping and receiving. Use of handheld scanners and printers, wireless communications, and advanced computer systems allow for a streamlined order picking and packing process. These technological advances, coupled with the increased stocking capacity, translate into faster shipping for consumers.

A new 3,000 square foot designer showroom is divided into two levels, and offers a sampling of Signature Hardware's plumbing, hardware, and lighting products available for sale. Clawfoot tubs, vanity cabinets, thermostatic showers, specialty shower rods and rings, floor registers, and decorative door hardware are just some of the items on display. Visitors are invited to tour the showroom, browse through the company catalog, and meet with a knowledgeable sales associate to purchase fixtures for their home improvement projects.

Signature Hardware's on-site customer service center is located at the heart of the 8,000 square feet of office space, which is also home to the executive, administrative, operations, information systems, and marketing departments. The floor plan includes a first-class employee break room with full service kitchen, a spacious conference room with skylight, and a state-of-the-art photography room with designer tile.

The company move was prompted by significant growth in recent years, an expanding product line, and an increasing number of employees. Signature Hardware, previously known as Clawfoot Supply, spent just over two years at its last facility on Jamike Drive, also in Erlanger.

### About Signature Hardware

Signature Hardware is a direct merchant of antique-style reproduction fixtures for the home. Working with the manufacturer and selling to the consumer, the company is able to provide superior service and exceptional value. The firm distributes its products nationwide by the use of print catalogs, over the web, and at their retail showroom located in the Cincinnati area.
